P R E F A C E .

(Though many Instruction Books for the Violoncello have been published, in which players may find much that is useful, not one has yet appeared by which he who is wholly ignorant of Music can be properly taught ; there is no doubt, however, that a gradual improvement towards perfection, (especially on the Violoncello) chiefly depends on the merits of Elementary Instruction.) If, by means of a faulty system, a scholar has acquired a stiff, awkward mode of bowing, he will afterwards find it a very difficult matter to use his bow with lightness and flexibility.

It happens but too often, that beginners give themselves little or no trouble about the first Elements, and yet there is nothing so indispensable to the scholar, even after a certain degree of improvement, as a full and perfect acquaintance with the rudiments of the art. (I strenuously recommend to all Masters the constant exercise of patience, for it is solely by the practice of this virtue that they will gradually lead their scholars to that stage of perfection which will enable them to satisfy themselves, and please others by their musical performance.

I must here remark, that although the following work cannot be properly addressed to proficients on the Instrument, it contains much information that may be serviceable to many of them.) Almost every Professor, both in the practice of his Art, and the mode of holding the Instrument, may have his own peculiarities. It is not my intention to interfere with, or to decry any particular system ; but it may not, however, be deemed out of place, if I be allowed to acquaint them with the method in which I use the Instrument. I have been frequently requested, in the most flattering terms, to give this Method to the Public, and the reason of my not having hitherto yielded to these entreaties, is that I have continually wanted both time and leisure to arrange this system, which is the result of many years' experience, in such an order as to make it fit for publication, and so as to afford me a hope that it might prove of that real utility which should be the sole object of such a work, and for which I now request the kind reception of the Public.

THE VIOLONCELLO.

THE POSITION IN WHICH A PLAYER SHOULD SIT.

THE best posture to be adopted for sitting, is that which is most conducive to bodily health. In playing the Violoncello, the chest should not be bent in, nor the shoulders pushed forward, as such a posture is sure to produce a crooked back. This must be avoided, and that posture be adopted, in which the Instrument can be played freely and with ease. During play, no change of posture should take place; least of all, anything like an affected attitude, which may betray the trouble employed in playing. The player, then, is seated on his chair, in such a posture that his thighs do not cover the seat of the chair; his legs should fall in a straight line to the ground, his feet turned a little outwards, but not too much. The heels may be six inches apart, and one foot not more advanced than the other. If the lower part of the Instrument be rather small, the feet should be brought a little closer together; if too broad, the feet must stand farther apart. The chair upon which the player sits should not be too high. The round side of the lower part of the belly of the Instrument should be pressed into the calf of the right leg, and the round part of the back into the left calf, so that the Instrument may rest on both legs, without being closely pressed by either.

The player should arrange his posture as nearly as possible in such a manner that the back of the Instrument may rest on his chest. The Instrument should be so held, that the lower part of the scroll (the C peg) may be in an exact straight line with his left eye, and that, between the scroll and his eye, there may be a distance of two finger's breadth.

The hand should so hold the neck, that the 1st finger should clasp it round, the 2nd should be bent so as to form three sides of a square, the 3rd should be bent half round, and the 4th held straight. The thumb should lie exactly opposite to the 2nd finger, placed so as not to project beyond the finger-board, but on a line with its surface.

The palm of the hand should not be pressed close to the neck, but should be kept hollow; nor must the hollow of the thumb be pressed close to the 1st finger. The neck also must remain quite free in the hand, with all the fingers placed upon the 1st string, and the string lying straight under the fingers, (as shown in Figure I.)

The more curved the fingers when placed upon the strings, the firmer will be the tone; the flatter they lie, the weaker and more dull. The truth of this fact is confirmed by experience; the pressure of the fingers, however, should not be excessive, or else the sinews of the fingers will suffer.

The Bow should be so held, that the 1st finger may half enclasp it; the 2nd finger should be placed exactly so that its end should just touch the hair above the nut. The 3d finger, which holds the bow in its proper direction, should lie on the end of the nut, and the 4th should cover the nut.

All the fingers should lie about one-fourth of an inch asunder. (See Figure III.)

The thumb should be placed on the other side, between the 2d and 3d fingers, and should hold the bow tight with the fleshy part of its fore-joint.

All the fingers except the first should be held straight. (See Figure IV.)

The knuckles of the hand should run parallel to the stick of the bow, which position should always remain, as much as possible, unaltered; for it is only by placing the hand firmly on the bow, that a strong, powerful tone can be drawn from the Instrument, without employing the force of the arm. On the other hand, if the strength of the tone proceed from the arm, the Instrument must be played with the arm held stiff, which entirely prevents a fine execution; and this is the cause that so few players arrive at perfection; they play with the arm, and not with the hand.

Stiffness in the arm generally proceeds from bending the body too much forward, and raising the elbows too high. The great French Violinists have long perceived this defect, and they therefore hold the elbows as low as possible in playing, and never raised; because an elevation of the elbow forces the shoulder out of its natural position. This defect may be also avoided in playing the Violoncello, by sitting quite straight, and taking care not to raise the shoulders. (See Figures II. and III.)

The elbow of the right arm should not be bent forward, (as then the shoulder-blade would be drawn from its natural position) neither should it be held back. The proper position of the elbow is found, by drawing the bow quite across the A string, with the hand firmly placed upon the bow in the position above-marked, and keeping the shoulder in its usual and natural position.

In making the up-bow, the arm should be neither bent back, nor forwards, but should remain in one and the same direction, as well as in making the down-bow, where the wrist of the hand has only to follow the direction in which the bow lies.

In making the up, as well as the down-bow, the bow must be drawn at right angles to the strings.*

The point of the bow should neither rise nor fall. To keep it in its proper direction is the most troublesome difficulty which the pupil has to overcome, and which he can surmount only by persevering industry, for a flexible wrist is indispensable to a fine execution, and whoever does not acquire this suppleness at first, will not attain it afterwards without infinite labor and pains. Many imagine they use their bow in perfection, if in changing the bow, they throw the hand straight forwards in making the up-bow, or straight backwards in making the down-bow. This however is just the reverse. The less the motion of the hand in changing the bow, (from up to down, or vice versa,) the finer and more connected is the playing. In changing the bow, the position of the fingers (of the right hand) should not undergo the slightest change, as the least alteration in their position would make the change of the bow audible. (See Figure 2.)

The left arm should be held free, with the elbow not raised too high, nor leaning against the Instrument, but at the distance of about one inch from the Violoncello. It is by this hand that the player should endeavor to gain strength in the fingers, either in the common position or in the shift. Of the method of holding the hand and the arm in the shift, I shall speak afterwards.

THE NOTES.

The Pupil at first should not be too much perplexed with scales, the value of notes, flats, sharps, &c. &c., but should be initiated into no more than what is absolutely necessary. We shall first consider the open strings, namely:

The Bass, or F clef, is placed upon the fourth line, and is marked by two strokes, or points.

The notes upon each string, are as follows:

The cypher 0 designates the open string. In fingering Violoncello Music, the thumb is not counted, but the first finger is marked 1, the second 2, the third 3, and the fourth 4.

If, at the beginning of the staff where the Clef is marked, there is no sign, either of a sharp (\sharp), or of a flat (\flat), the key is then called C Major. For every scale seven notes are required; the eighth finishes the scale. C is the key note; D, the major second; E, the major third; F, the minor fourth; G, the full, or major fifth; A, the major sixth; B, the major seventh; C the octave.

From C to D, is a whole tone; from D to E, also a whole tone; from E to F, a semitone; from F to G, a whole tone; from G to A, a whole tone; from A to B, a whole tone; and from B to C, a semitone.

A scale, therefore, consists of eight tones—six whole tones, and two semitones, for with seven tones only, the scale would not be complete. The seventh, which precedes the eighth, is called the leading note, because, as the scale cannot be finished on the seventh, it leads to the eighth.

The notation of modern music requires five lines. In the Bass Clef, the first, or lowest line, is named G, the second B, the third D, the fourth F, and the fifth A. In all other clefs, the lines are named otherwise, as will be hereafter shown.

As soon as the pupil is acquainted with the notes above-marked, he may begin to play; at first, only long notes upon the A string, as this is the most difficult of the four strings to manage, both with regard to the holding of the hand, and the bending of the wrist. Here the pupil should strictly adhere to the above rules, illustrated by the two figures I and II. The stick of

* The terms UP-BOW, and DOWN-BOW, are taken from the Violin, and applied to the Violoncello. On the Violin, an up-bow signifies the drawing of the bow upwards from the point to the nut; a down-bow, the drawing of the bow from the nut to the point. I have retained these expressions and used them, as they are justified by common practice.

For the Violoncello.

the bow should be held at not a greater distance than half a finger's length from the A string. If at first it should even touch the string, it is of no great consequence, as this is a habit which will soon cure itself. Here, however, no force should be thrown into the arm, but it should gently follow the wrist, which latter must guide the bending of the hand. This exercise should be continued until the hand has acquired some dexterity in the practice. This may perhaps be discouraging at first, but it is the only means of acquiring a fine and effective bow-hand. The study should be begun with the down-bow, and care should be continually taken that the bow remain always in the same direction in which the stroke is begun.

The pupil may now proceed to the easy pieces which I have written expressly as exercises on the A string, and he should continue them until he can play them with tolerable facility.

THE PROPER METHOD OF HOLDING THE FINGERS.

Here I must earnestly caution the pupil against bad habits, which in this case it is most difficult to lay aside.

1. The thumb must be so held as to fall exactly opposite to the 2d finger.
2. The third joint of the first finger, (by which is meant the joint lying nearest the hand) should be laid on the neck of the Violoncello.
3. The fingers should be all held at the distance of at least a thumb's breadth above the strings, and all of them curved, except the fourth, which should be held straight, but not further removed from the strings than the others.
4. To make the second note, B, upon the A string, the 1st finger (still curved) should be pressed down, without disturbing the position of the other fingers.
5. To make the third note, C, the 2d finger (preserving its shape of three sides of a square) should be laid on the string, the 1st finger still remaining down; the thumb should be, as aforesaid, opposite to the 2d finger.
6. To make the fourth note, D, the 4th finger (held straight) must be placed on the string; the 1st and 2d fingers still remaining in their former position, and the 3d finger (still kept bent) must be also laid on the string.
7. The 1st, 2d and 3d fingers must still retain their curvature, and in the descending scale, the fingers, when taken off one by one, must remain in exactly the same position as before they were placed on the string.

(All the exercises in this Method will be provided with a simple accompaniment, as adapted to the case. A display of science in the accompaniment is of no service to the beginner; but the accompaniment itself is of use in making him play in time.)

The whole length of the bow should be used for every note. It is of the first importance to the beginner to accustom himself to use the whole length of the bow, partly in order to exercise the wrist, and partly to divest the arm of all stiffness and awkwardness in playing.

Begin with a down-bow.

No. 1.

Two staves of musical notation. The upper staff is in bass clef and contains a sequence of notes with fingerings: 2, 1, 2, 0, 4, 2, 1, 4, 2, 4, 1, 0, 2, 1, 2, 4. The lower staff is in bass clef and contains a sequence of notes with fingerings: 2, 1, 2, 0, 4, 2, 1, 4, 2, 4, 1, 0, 2, 1, 2, 4.

Two staves of musical notation. The upper staff is in bass clef and contains a sequence of notes with fingerings: 0, 2, 1, 2, 4, 2, 1, 2, 0, 4, 2, 1, 4, 2. The lower staff is in bass clef and contains a sequence of notes with fingerings: 0, 2, 1, 2, 4, 2, 1, 2, 0, 4, 2, 1, 4, 2.

No. 2.

Two staves of musical notation. The upper staff is in bass clef and contains a sequence of notes with fingerings: 0, 1, 2, 1, 2, 4, 2, 4, 2, 1, 2, 1, 0, 1, 2, 1, 2, 4, 2, 1, 2. The lower staff is in bass clef and contains a sequence of notes with fingerings: 0, 1, 2, 1, 2, 4, 2, 4, 2, 1, 2, 1, 0, 1, 2, 1, 2, 4, 2, 1, 2.

No. 3.

Two staves of musical notation. The upper staff is in bass clef and contains a sequence of notes with fingerings: 0, 2, 1, 0, 1, 4, 2, 1, 0, 2, 1, 0, 1, 0, 2, 1, 0, 1, 4, 2, 1, 2, 1, 0. The lower staff is in bass clef and contains a sequence of notes with fingerings: 0, 2, 1, 0, 1, 4, 2, 1, 0, 2, 1, 0, 1, 0, 2, 1, 0, 1, 4, 2, 1, 2, 1, 0.

No. 4.

Two staves of musical notation. The upper staff is in bass clef and contains a sequence of notes with fingerings: 0, 2, 0, 2, 1, 4, 1, 4, 0, 2, 0, 4, 1, 0, 2, 0, 2, 1, 4, 1, 4, 2, 1, 2. The lower staff is in bass clef and contains a sequence of notes with fingerings: 0, 2, 0, 2, 1, 4, 1, 4, 0, 2, 0, 4, 1, 0, 2, 0, 2, 1, 4, 1, 4, 2, 1, 2.

No. 5.

Two staves of musical notation. The upper staff is in bass clef and contains a sequence of notes with fingerings: 2, 0, 2, 0, 4, 1, 4, 1, 2, 1, 0, 4, 2, 1, 2, 0, 2, 0, 4, 1, 4, 1, 2, 1, 0. The lower staff is in bass clef and contains a sequence of notes with fingerings: 2, 0, 2, 0, 4, 1, 4, 1, 2, 1, 0, 4, 2, 1, 2, 0, 2, 0, 4, 1, 4, 1, 2, 1, 0.

No. 6.

The mark  signifies that both parts of the piece of music are to be played twice. When the two dots are placed upon only one side of the Double Bar, thus,  it signifies that only the part marked with the dots is to be repeated. The first part, especially in Quartetts, frequently leads into the second, which is then marked 

When the pupil has acquired a little facility in the proper use of his arm and wrist upon the A string, he should proceed to make himself acquainted with the D string. In order to acquire the proper position of the bow upon the second string, the hand and the bow should be held upon the first string, (A) as represented in Fig. I. where the stick of the bow comes in close contact with the A. Let the wrist of the (bow) hand be then turned a little backwards, without making the slightest alteration in the position either of the fingers upon the bow, or of the bow-arm, the stick of the bow will then become a finger's-breadth removed from the strings, and the hair will come in contact with the D string. With the bow in this direction, without making any change in the bow-hand, or bending the elbow backwards or forwards, the bow should be drawn down to the point, and the D string should be exercised up and down, in the same manner as the A, and always with long drawn notes, thus :

The following exercise should then be played, in which care must be taken that the thumb be not removed from its original position. The rule for the position of the fingers upon the A, applies equally to the D string.

The pupil should next proceed to the following exercise upon A and F. The bow hand should be placed as in Fig. I., upon the A string ; and the bow drawn to the point as in Fig. V.; the wrist should then be turned back without changing the position of the arm, and the F made with an up-bow, till the nut of the bow is close upon the strings ; then the wrist should be turned back as before, (as shown in Fig. I.) and the exercise continued until the wrist becomes accustomed to this motion.

Here follow some exercises for the hand and bow upon two strings, both with the up and down-bow, to accustom the wrist to the change from one string to another, and to give the pupil a facility in shifting his fingers across the strings.

No. 1.

2 1 0 4 0 1 2 4 2 1 4 1 4 2 1 4 2 1 0 4 2 1 0

When some facility has been acquired upon the two strings A and D, the Pupil should then proceed to the third string, and practice upon it in the same way as upon the others, i. e. the bow should be held in the same position as that represented on the A string, by Fig. I. The hand should be then turned slowly round, without moving the arm, till the hairs of the bow fall upon the G string, and the bow be drawn slowly down to its point, without distorting either the hand or arm. In order to prevent all stiffness in the arm, the hand should be held a little lower in making the down-bow, in proportion as the point of the bow approaches the strings, and till the arm becomes quite straight, where the Pupil should take care not to lower his arm in making the up-bow. The G string should be exercised in the same way as the A and D; with a long bow up and down from point to nut, and from nut to point.

The following exercise upon the G and D strings, which is intended to give flexibility to the wrist, should be next practised. While the wrist is bent backwards, the arm must remain in its original direction. To accustom the fingers to a firm hold of the strings, take E on the D string, and C on the G string, and keep the second and third fingers down on the G string. The thumb must remain as before, opposite the second finger.

As soon as the wrist has acquired some facility in this exercise, the Pupil may proceed to the following studies on the three strings A, D, G; where it must be mentioned that the two semitones B, C, upon the G string, must be taken with the third and fourth fingers. The chief object of this study is to exercise the wrist in drawing both the up and down bows. All these exercises must be practised with the wrist only, and without moving the arm in the slightest degree from its natural position.

The fourth string (C) must be exercised in the same manner as the others. The bow and arm should be held as shown in Fig. I, the wrist turned slowly back, without changing the position of the hand upon the bow, or making the least motion with the forearm, and the flat part of the bow-hairs will then fall upon the C, (the fourth string.) When in this direction, the bow should be drawn down to its point, so that the hairs lie over the thigh, but without the least motion of the shoulder or of the arm. The C should be at first exercised up and down with long notes, and with the whole length of the bow, thus :

The wrist should now be exercised upon the two strings G and C, with the third finger, (E) upon the C string. When the hand is not too small, the thumb should retain its former position on the neck of the instrument. But if the hand be not sufficiently large, it may then be turned a little towards the lower string, not, however, more than the necessity of the case may require. The shifting of the bow from one string to the other must be done by means of the wrist only. Begin with the G string, and draw the bow exactly in the same direction down to the point, and then turn the wrist back upon the C string for the E. In making the up-bow, let the wrist be slightly raised, so that the point of the bow may be directed a little downwards. To do this dexterously, will be of the greatest service to the pupil afterwards, when he will have to draw the tone from the C string with a quick bow. All these directions regarding the holding of the bow may be thought by many, severe and difficult to put in practice ; but this is a subject which must not be dismissed without special consideration, since the whole secret of fine playing may be found in a thorough knowledge of the right management of the Bow. Great care should be therefore taken, when playing upon the lower strings, that the first finger on the bow-hand be not held straight, as it should always remain bent. This fault I have observed in many players.

In exercising all the notes upon the C string, the pupil should begin with the down-bow, and to prevent all stiffness of the arm, should not press the bow too firmly on the strings, as strength of tone will come of itself in time.

Exercise on the G and C Strings.

TUNING THE VIOLONCELLO.

As the Pupil cannot always have the assistance of his Master to tune his Instrument, and as the strings will often get out of tune, I consider it advisable to lay down directions by means of which he may learn how to put his own Instrument in good tune. To find the proper pitch which it should be tuned, (which cannot be expressed in words) he should provide himself with an A tuning fork. The 1st string must be tuned by this A, which is an octave above the open A string, and which may be found to lie on the exact middle of the whole length of the string. If the pupil find any difficulty in tuning the string by the octave above, he has only to place his finger on the middle of the A string, and then draw the bow across it, to produce the identical tone of the fork. One third of the whole length of the string gives the fifth above. On this spot, the Teacher should draw a cross-line with a lead pencil upon the finger-board; opposite to this line, which should be drawn so as not to be easily rubbed out, the Pupil should lay his finger on the 2d string (D), and draw the string up till it is in unison with the 1st: the third must be tuned in the same way to the 2d, and the 4th to the 3d. Any further remarks upon the tuning of the Instrument or management of the pegs, would be here superfluous, as a few minutes' explanation from the Teacher is sufficient to make these things clear to any Pupil.

Before proceeding further, I consider it of the greatest consequence that the fingers be well exercised upon the A, D, and C strings. This exercise should be made with a small portion of the bow used towards the point. By this practice, the Pupil will soon acquire facility in changing the 2d finger from the 3d, and vice versa.

Now that the first difficulty in using the bow is surmounted, we shall offer a few remarks on the value of the notes, the various divisions of time into bars; on Rests, &c.

NOTES, BARS, AND RESTS.

The duration and value of tones are shown by the various forms of the notes. We here annex their different shapes, together with those of their corresponding Rests. By the term "rests" are meant those characters which occur in music, and which indicate an intermission of the voice or sound during the time belonging to a certain number of notes or bars.

The Double Breve and Breve occur only in old church music; but in all modern music, Rests which continue during several bars are of frequent occurrence.

Here follows a synopsis of the various divisions of the Bar in Common Time.

ONE SEMIBREVE CONTAINS*

TWO MINIMS, OR

FOUR CROTCHETS, OR

EIGHT QUAVERS, OR

SIXTEEN SEMIQUAVERS, OR

THIRTY-TWO DEMISEMIQUAVERS, OR

SIXTY-FOUR DEMI-DEMISEMIQUAVERS, OR

ONE HUNDRED AND TWENTY-EIGHT DOUBLE DEMI-DEMISEMIQUAVERS.

The Bar in the above example contains four crotchets; it is consequently called Common, or even time, and is marked with a C. The bar of $\frac{2}{4}$ time contains two crotchets, and is the one half of the bar of common time. The bar of $\frac{6}{8}$ time is of the same description as the last mentioned, as it also may be divided into two equal parts. In order to express the duration of three quavers by a crotchet, a dot must be placed after it, thus:  which dot lengthens the time of the note by one-half. The same rule holds good with all notes which have the dot placed after them. The Rests are affected in the same way by the dot, which, however, is never used after the whole or half Bar Rest.

Common Time.

Compound Common Time.

NOTE.—When one note followed by a dot makes up the whole bar, it shows that the time of the bar is not $\frac{3}{4}$, but $\frac{6}{8}$. There is a great difference between the treatment of the $\frac{6}{8}$ and the $\frac{3}{4}$ time, though in the notation of Music, many persons erroneously write sixes instead of triplets. In triplets, the accent lies on the first note only, in sixes on the first, third and fifth, though in practice this accent may be scarcely audible, and may be said to exist only in the expression. To common time, also, belongs the bar of $\frac{12}{8}$, which may be considered the double of the $\frac{6}{8}$ Bar. In treatment it differs much from the Bar of four crotchets, though this latter frequently has the effect of the $\frac{12}{8}$ Bar.

The $\frac{3}{2}$, $\frac{3}{4}$ and $\frac{3}{8}$ Bars belong to triple, or uneven time.

THREE MINIMS. THREE CROTCHETS. THREE QUAVERS.

SIXES.

TRIPLETS.

The image shows four staves of music. The first staff illustrates three measures: the first with a single minim in 3/2 time, the second with three crotchets in 3/4 time, and the third with three quavers in 3/8 time. The second staff shows three measures of sixes (sixteenth notes) in 3/2, 3/4, and 3/8 time. The third staff shows three measures of triplets (groups of three notes) in 3/2, 3/4, and 3/8 time.

The tempo, or measure of the movement, is always marked at the top of each piece. If, in common time, a stroke is made through the C, thus C , it signifies that the piece is to be played in *alla Breve* time, in which there are only two (Minims) counted in the Bar. This occurs in pieces which are intended to be executed with much animation. In the Second Part will be found some further observations upon the time of a movement.

When a Bar is full, that is when it is found to contain all the parts which should belong to it, according to the Tempo marked at the beginning of the Piece, it is then marked off by a stroke drawn across the staff. All the notes, rests, and dots, between two such strokes in every sort of Time, are called a Bar.

With respect to the Dot, it must be also remarked, that when several dots are placed after a note, which is frequently the case, each dot continues the length of the note one half of the time added to it by the former dot, thus :

The image shows two staves of music in common time (C). The top staff has a sequence of notes with one, two, and three dots, illustrating how the duration of each note increases. The bottom staff shows a similar sequence with a different rhythmic pattern.

The Dot is also frequently placed in the following bar :

The image shows two staves of music. The top staff shows a sequence of notes with a dot placed after the first note in a bar. The bottom staff shows a similar sequence with a dot placed after the second note in a bar.

SHARPS AND FLATS.

In order to learn how to play in a different key from that of C major, we shall next proceed to the consideration of sharps and flats. A sharp (\sharp) placed before a note raises it a semitone, and a flat (\flat) preceding a note lowers it a semitone. To bring back a sharpened or flattened note to its former state, the sign (\natural) is prefixed. If, when a note is raised two semitones by a double-sharp, (\times) or depressed two semitones by a double-flat, ($\flat\flat$) it is required to be raised or depressed one semitone, the natural (\natural) is placed first, and then the sign into which the note is to be brought (\sharp) or (\flat).

The pupil should first practice upon all the four strings those notes which are raised by the sharp, (\sharp) and then those marked with a (\flat), i. e., flattened.

C $C\sharp$ D $D\sharp$ E $E\sharp$ F $F\sharp$ G $G\sharp$ A $A\sharp$

B $B\sharp$ C $C\sharp$ D $D\sharp$ E $E\sharp$ F $F\sharp$ G $G\sharp$

A $A\sharp$ B $B\sharp$ C $C\sharp$ D $D\sharp$ D $D\flat$ C $C\flat$ B $B\flat$

A $A\flat$ G $G\flat$ F $F\flat$ E $E\flat$ D $D\flat$ C $C\flat$

B $B\flat$ A $A\flat$ G $G\flat$ F $F\flat$ E $E\flat$ D $D\flat$ C

THE SCALES.

In every major scale, from the third to the fourth, and from the seventh to the eighth, the interval is only a semitone. These are here marked with a brace. All the rest are full tones, i. e., a full tone lies between each of them, thus :

A Half. A Half.

and the same for all other major scales.

Every Major has a relative Minor scale. The key-note of this scale is a minor third below the key-note of the major scale; and in the ascending scale its seventh must be raised a semitone in order to lead to the octave. Frequently, as a leading note to the seventh, the sixth also is sharpened, which is then called the major sixth. In the descending minor scale, all the notes remain as in the natural scale, i. e., they are not sharpened.

Reckoning from C major, which has no signature, the first sharp key is G, a fifth above it, and the next, a fifth again above G, and so on, where in every scale the 7th must be raised by a sharp (\sharp). Thus, in the scale of G major, F will be sharp. This signature is marked at the beginning of each staff, immediately after the clef, and serves for the whole piece wherever the note may occur.

So far, we have had to deal only with minor thirds in the fingering, but in the scale of G major, a major third will occur on the C string, i. e., D E F \sharp . In playing this major third, the first note should be made with the 1st finger, the second with the 2d finger, and the third with the 4th finger; and care must be taken that in stretching out the 4th finger, the hand be not moved from its original position.

for the Violoncello.

To facilitate the practice of the different scales, we subjoin some exercises adapted to the strength of the beginner ; at the same time remarking that they must not be played too fast, but in a time suited to the pupil's capability of neat execution
G major has one sharp, F \sharp

The relative minor to the scale of G major, is E minor. In the ascending scale, the D, which is here the leading note to E, must be raised a semitone, thus : D \sharp . This sharp (\sharp) however is not marked in the signature, at the beginning of the music, but always written down before the D, wherever it may occur throughout the piece. In making the D \sharp on the D string, the position of the hand upon the neck of the Instrument should not be changed, but the first finger should be stretched back as far as necessary to make the note.

In the same way as we proceeded to a fifth above from C to G, we shall advance another fifth, from G to D, where again the 7th note in the scale is sharpened, the F still remaining sharp. This is continued throughout all the scales made on the fifths above. In fingering the scale of D major, a major third will occur on the G and D strings.

The relative minor to D major is B minor.

In this exercise it will be perceived that the B in the first bar is marked for the 3d finger, because the same finger must be used for the second note ; and it would be inconvenient in the same distance to use two different fingers. The same occurs in the 6th bar. In the 13th bar the 2d finger must be taken, although in making the major third on the G string, the 1st finger should be used, (since A# precedes A, to which the 1st finger properly belongs, and it would be inconvenient to use it for the preceding F#.) These are cases of continual occurrence in every sort of music.

A fifth above D will bring us to A major. In this scale, the F and C remain sharp, and the G sharp is added.

It will be useful for the Pupil to make himself as soon as possible acquainted with the most convenient methods of fingering. With this view, I have here written some pieces which may be fingered in part differently from the manner laid down in the scale. It will be the Teacher's business to explain where these varieties occur, and their causes. The relative minor to A major is F \sharp minor.

E major lies a fifth above A. This key has four sharps, F \sharp , C \sharp , G \sharp and D \sharp .

The relative minor to E major is C# minor.

It would be injudicious at first to perplex the Pupil with those scales which contain more than four sharps, if indeed what is here given be not too difficult for some. In order, however, to acquaint them with the signatures, I shall make the following observations.

B major has five sharps—F#, C#, G#, D# and A#. Its relative minor is G# minor.

F# major has six sharps—F#, C#, G#, D#, A# and E#. Its relative minor is D# minor.

C# major has seven sharps—F#, C#, G#, D#, A#, E# and B#. Its relative minor is A# minor.

B MAJOR

F# MAJOR

C# MAJOR

for the Violoncello.

Having thus discussed the sharp keys, which were found by ascending continually a fifth above, we shall now proceed to a consideration of the flat keys by descending a fifth from C natural. In the flat keys, the fourth note in the scale must be always marked with a flat (*b*), consequently, the first flat key will be that of F major, in the scale of which the B will be flattened.

The first system of music consists of three staves. The top staff is a single bass line with a key signature of one flat (B-flat) and a 3/4 time signature. It contains a scale of notes with fingerings: 4, 0, 1, 2, 4, 1, 2, 4, 0, 1, 2, 4, 3, 1, 0, 4, 2. The grand staff below it has two bass lines. The upper bass line has a key signature of one flat and a 3/4 time signature, with fingerings: 2, 0, 4, 1, 2, 0, 1, 4, 0, 2, 0, 4, 1, 4, 2, 0, 2, 1, 0, 0, 4, 4, 1. The lower bass line has a key signature of one flat and a 3/4 time signature, with fingerings: 4, 2, 1, 0, 1, 0, 1, 2, 0, 1, 2, 4, 2, 1, 2, 1, 0, 1, 2, 1, 0, 4, 2, 1, 2.

The thumb must still retain its original position opposite to the second finger. In making the B upon the A string, the first finger must be bent back without removing the thumb from its position, as was the case in the sharp keys. The relative minor to F major is D minor.

The second system of music consists of three staves. The top staff is a single bass line with a key signature of one flat and a 3/4 time signature, with fingerings: 0, 1, 2, 4, 0, 1, 2, 4, 3, 1, 0, 4, 2, 1, 0, 4, 2, 1, 0, 4, 3, 1. The grand staff below it has two bass lines. The upper bass line has a key signature of one flat and a 3/4 time signature, with fingerings: 0, 2, 0, 4, 2, 1, 0, 0, 1, 0, 4, 2, 1, 0, 4, 0, 2, 0, 1, 2, 4, 0, 1, 2. The lower bass line has a key signature of one flat and a 3/4 time signature, with fingerings: 4, 2, 1, 0, 1, 0, 1, 0, 0, 1, 0, 1, 0, 0, 4, 0, 2, 1.

1 0 2 0 4 1 0 0 4 3 0 1 4 1 4 0 4 2 0 1 0 2 1 1 0 2 1 0 4 0

0 2 0 4 1 4 1 0 0 1 0 4 2 1 0 4 3 0 4 0 4 2 1 4 0 2

0 1 3 0 2 4 0 2 1 4 1 4 3 1 0 4 2 4 0 2 0 1 2 0 4 1 0 4 0

The key of B \flat major is a fifth below F. The fifth note in the descending scale (E) must be flattened. B \flat major has two flats, B \flat and E \flat .

2 4 0 1 2 4 0 1 3 4 3 1 0 4 2 1 0 4 2 1 0 4 2 1

2 0 2 1 4 1 0 3 0 2 4 1 0 3 2

2 1 4 2 1 2 0 2 1 0 4 0 4 2 4 1 2 0 1 3 1

for the Violoncello.

2 0 2 1 4 0 1 0 2 4 0 1 2 2 4 2 1 0

4 2 1 2 2 1 4 1 2 4 2 1 0 4 2 1 0 2 1 0 4 2 4 0 4 3 1 2

The relative minor to B \flat major is G minor.

0 1 2 4 0 1 3 4 2 1 0 4 2 1 0

0 2 0 4 1 4 2 0 3 4 0 1 4 2 0 4 3

4 0 1 2 4 2 0 1 2 1 4 2 1 0 4 2 1 4 2 0 3 0

4 0 4 1 4 2 0 3 0 1 4 0 2 1 4 0 1 4 0

4 1 0 1 0 2 0 4 1 4 1 4 1 4 2 0 4 3 0 4 3

A fifth below B♭ major is E♭. E♭ major has three flats : B♭, E♭ and A♭.

I have always found it extremely useful to accustom the pupil to every motion of the hand, without allowing the thumb to be removed from its position on the neck. For this reason, G and A♭ should be taken on the D string with the 4th finger. In making the A♭, the hand should be bent a little forward, (without removing the thumb from its last position), and the other fingers taken off ; but on the G they should all lie in their proper places.

The relative minor to E♭ is C minor.

A fifth below E♭ lies A♭. The key of A♭ major has in its signature B♭, E♭, A♭ and D♭. Here must be remarked, that a minor third occurs upon the A string, which must not be taken with the 1st, 2d and 3d fingers consecutively, but with the 1st, 3d and 4th. It will be more convenient to take the C upon the A string with the 3d finger; the D♭ upon the G string must be taken with the 4th finger, and the hand inclined forward, in the same manner as in making the A♭ upon the D string.

The relative minor to A♭ major is F minor.

Those scales which contain a greater number of flats will be learned afterwards by the pupil, without assistance. But, to make him acquainted with the order in which they progress, I shall here set them down in the same form as the sharps.

- D♭ major has 5 flats : B♭, E♭, A♭, D♭ and G♭. Its relative minor is B♭ minor.
- G♭ major has 6 flats : B♭, E♭, A♭, D♭, G♭ and C♭. Its relative minor is E♭ minor.
- C♭ major has 7 flats : B♭, E♭, A♭, D♭, G♭, C♭ and F♭. Its relative minor is A♭ minor.

D♭ MAJOR. G♭ MAJOR. C♭ MAJOR.

THE SHIFT.

Having thus explained every thing regarding the first position of the hand and fingers, by which the Pupil is now prepared to proceed to those notes which lie above the D upon the A string, I shall here lay down a model, by means of which he may know how to gradually accustom his hand to the different positions of the shift, as far as the upper A, (the octave to the open string) together with a synopsis of all the tones which are used in each particular position of the hand in the shift upon the three other strings. The thumb remains as before, opposite to the second finger, (while the whole hand must be gradually moved higher) but without pressing tightly upon the upper third of the neck. It should slip up the neck on a line with the second finger, and be held free from all strain. Many beginners find a difficulty in passing the thumb up or down the neck at the same time with the hand. The cause of this difficulty is, that they press the neck too tightly with the thumb. I must, therefore, here distinctly state, that no more force should be ever applied than what is necessary to keep the hand in its position, since any further pressure is altogether a useless exertion.

All the thirds in the first octave, whether major or minor, must be taken with four fingers, though in making each third, one of the fingers must remain unemployed. Above the Octave A, the thirds should be taken with three fingers, of which more will be said hereafter.

NOTE.—As the lower notes are designated by the leger lines below the staff, so the leger lines above the staff show the higher notes. Examples of them as high as D have been already shown. A stroke through the head of the note D, makes it a note higher, i. e. E. Two strokes under the head of the note make it F. Two under it and one through the head make G; and a ♯ placed before the G makes it, as already shown, G sharp. It is unnecessary here to proceed further. The position of the hand is shown in Figure 2.

The musical notation consists of eight staves, each representing a different string position. Each staff shows a sequence of notes with fingerings (1-4) and note names. The notes are: C, D \flat , D, E \flat ; C \sharp , D, D \sharp , E; D, E \flat , E, F; D \sharp , E, E \sharp , F \sharp ; E, F, F \sharp , G; E \sharp , F \sharp , F, G \sharp . The notation includes leger lines above and below the staff to indicate the vertical position of the notes on the string.

The characters \times or $\flat\flat$ placed before a note, cause the note to be denominated double-sharp, or double-flat; thus: F \times is called F double-sharp, B $\flat\flat$ is B double-flat, &c.

THE BOWING.

We have hitherto had no occasion to consider slurred notes, as it is first necessary to accustom the fingers to move freely and without constraint. As soon, then, as the Pupil can play the notes with facility, he may begin to study the various modes of bowing, in such a manner, however, as not to interfere with the freedom of the arm. I here subjoin an easy example, where it must be remembered that when two detached notes follow two slurred notes, the slurred notes must be played with a long, and the detached notes with a short-Bow, and that the same rule must be observed when playing three slurred notes followed by one detached. The length of the Bow used for three slurred notes and one detached, should not be so great as that used for two slurred and two detached notes.

No. 1.

Two systems of musical notation for No. 1. Each system consists of two staves. The first system shows a sequence of slurred notes (1-2-4, 1-4, 0-1-2-0, 3, 4-0-1-2) followed by detached notes (4-1-3-4, 3-4-1-3, 4). The second system shows a sequence of slurred notes (0-1-2-0, 3, 1-2-4-1, 4, 4-0-1-3, 4-0-1-2, 1-2-0-1, 4) followed by detached notes (4, 4).

No. 2.

Two systems of musical notation for No. 2. Each system consists of two staves. The first system shows a sequence of slurred notes (1-2-4, 1-4, 0-1-2-0, 3, 4-0-1-2) followed by detached notes (4-1-3-4, 3-4-1-3, 4). The second system shows a sequence of slurred notes (0-1-2-0, 3, 1-2-4-1, 4, 4-0-1-3, 4-0-1-2, 1-2-0-1, 4) followed by detached notes (4, 4).

No. 3.

Two systems of musical notation for No. 3. Each system consists of two staves. The first system shows a sequence of slurred notes (1-2-4, 1-4, 0-1-2-0, 3, 4-0-1-2) followed by detached notes (4-1-3-4, 3-4-1-3, 4). The second system shows a sequence of slurred notes (0-1-2-0, 3, 1-2-4-1, 4, 4-0-1-3, 4-0-1-2, 1-2-0-1, 4) followed by detached notes (4, 4).

I must here explain that whenever notes are marked to be played alternately slurred and detached, those which are to be played detached, (whether marked with a dot thus or dash | | | |) should never be made with a close, short Bow.

THE PREPARATORY-BAR.

All the preceding exercises have begun with the full Bar, or accented note; here follow some studies for the preparatory-Bar. When a movement commences with a full Bar, it must be always begun with a down-Bow, but if it begin with a preparing Bar, the up-bow must be used. This preparatory-Bar does not, however, always consist of a single note, but frequently of several, sometimes, indeed, it may be a matter of great doubt whether the movement should be begun with an up, or a down-Bow. In accompanying, it is not considered of much consequence, but in solo playing, an attention to this particular is highly important. In order to set this doubt at rest, I have in my compositions employed the following sign (\wedge) to designate the down-Bow, and (\vee) to show when the up-Bow should be used. In Trios and Quartets, these signs are not generally adopted; the Player must there be guided in his choice of the up, or down-bow, by practice and experience.

Here follow some examples of the different sorts of the Preparatory-Bar :

The following Example is in E minor, which is the relative minor to the key of G major. But the major scale has also another minor scale, which is made by changing the major third (from the key note) into a minor third. This change, from major to minor, or from minor to major, usually occurs in those compositions which consist of a fixed Rhythm, (a determined number of bars) as in Andantes, Rondos, Romances, &c. The part written in the major key should be marked "Maggiore," and the minor "Minore." These marks are often omitted, but it is nevertheless proper that the Pupil should be made acquainted with their meaning.

DA CAPO.

When the words "Da Capo" are placed at the bottom of a piece of music, consisting of several parts, they signify that the whole of the piece should be repeated as far as the following mark . The expression, "Da Capo," means "from the beginning." If several notes of the same pitch follow each other, and are not intended to be played as detached notes, they are all connected with a Slur, as in the following Example. This is of frequent occurrence.

NOTE.—When one or more Bars are marked, thus:  it signifies that they should be played twice; the word Bis, which signifies twice, is not always written above. The dots placed in the spaces of the staff, are sufficient to show that the bar or bars must be repeated.

THE CLEFS.

Before we proceed further, it will be necessary to consider the various Clefs used in Music. The compass of the Violoncello is too extensive to be comprised in one clef. Although only some of the Clefs are used in modern Violoncello music, it is useful for the Pupil to be acquainted with them all, as they sometimes occur in old music, more especially in that of Boccherini. Four of these clefs are found in the compass of the human voice. The Bass and Tenor belong to the male, the Contr' Alto and Soprano, to the female voice. The Bass Clef is placed, as above said, on the 4th line. The Tenor Clef is also situated on the 4th line, and is played five notes higher, in the same way as a Tenor voice sings five tones higher than a Bass. The Contr' Alto is placed upon the 3d line, and, in form, resembles the Tenor. This is the deep female voice, and its notes are played seven tones higher than the Bass Clef. The Soprano lies five tones above the Contr' Alto; its clef is placed on the 1st line, and its form resembles that of the Tenor and Contr' alto clefs. The notes in the Soprano clef are played ten tones above those of the Bass. The form of the Violin clef is peculiar to itself, it differs from that of all the others, and is placed upon the 2d line. The notes of the Violin are played twelve tones higher than those of the Violoncello.

The following Example, is a simple passage exhibiting the identical notes in all the Clefs.

VIOLIN-CLEF IN G. 

SOPRANO-CLEF IN C. 

CONTR'ALTO-CLEF IN C. 

TENOR-CLEF IN C. 

BASS-CLEF IN F. 

That we may not perplex the Pupil with so many clefs at once, we shall first direct his attention to the Tenor clef, and endeavor to give him some facility in using it, before we proceed to the Violin-clef. This is more particularly necessary, as the Tenor-clef occurs in Violoncello music much oftener than the Violin-clef, even in the common position where the thumb is not required, and where the notation is continually changing from the Bass to the Tenor-clef. The Pupil must, therefore, endeavor to make himself as perfectly acquainted with the Tenor as with the Bass-clef. The difficulty of remembering the several clefs is not so great as may be imagined. The variety of clefs requires only a careful advancement of the hand, which the Pupil will hereafter make himself acquainted with.

Musical notation for Tenor and Bass clefs. The Tenor clef (C-clef on the 4th line) shows notes G, A, B, C, D, E, F, G, A, B, C, D, E, F, G, A with fingerings: 0, 1, 3, 4, 0, 1, 2, 4, 0, 1, 2, 4, 1, 2, 3, 0. The Bass clef (F-clef on the 4th line) shows the same notes with fingerings: 0, 1, 2, 3, 4, 0, 1, 2, 3, 4, 0, 1, 2, 3, 4.

The upper A must never be taken with the fourth finger, because all thirds above this A are made with the three fingers which lie close to each other. This A, (when the hand is not in the same position) is taken as an HARMONIC. The Harmonic is produced by laying the finger gently on the string, without pressing it tightly against the finger-board. But when the hand remains in this position, the A must be played with a firm pressure, and the third F, G, A, will lie conveniently under the fingers, as well as the corresponding thirds upon the D, G, and C strings, thus:

Musical notation for A, D, and G strings. The A String shows notes G, A, B, C, D, E, F, G, A with fingerings: 0, 1, 2, 4, 1, 3, 4, 0, 3, 4, 2, 1, 1, 2, 3, 2. The D String shows notes G, A, B, C, D, E, F, G, A with fingerings: 0, 1, 2, 4, 1, 3, 4, 0, 3, 4, 3, 1, 1, 2, 3, 2. The G String shows notes G, A, B, C, D, E, F, G, A with fingerings: 0, 1, 3, 4, 1, 3, 4, 0, 3, 4, 3, 1, 1, 2, 3, 2.

An Harmonic Tone is marked by a cypher (o) placed over the figure representing the finger, but when meant to designate the open string which requires no finger, the o is used without any figure underneath.

The thumb, which in making the upper G, partly surrounds the neck, must remain in its proper place, and the third finger must be held straight, by which means the A can be reached with ease.

Before proceeding to the shift, a few Studies are here annexed, to exercise the Student in the practice of the Tenor-clef.

It must be understood, that the signatures of sharps and flats in the Tenor-clef, are the same as those in the Bass clef. Notes which are marked with points, and tied together with a slur, must be played in one bow, and without letting the bow quit the strings, each note being separated from the other by a slight pressure of the bow in its course. It must be also remarked, that those passages which are to be played on the second string (D), are here marked 2nda. When the line ~~~~~ ceases, it is no longer necessary to continue on the same string, as the passage will then lie in the original position of the hand. Where there is no mark underneath, the A string must be used whenever the notes will allow of it. Though, as we have already remarked, we shall afterwards more fully discuss the subject of Time, we shall here leave it to the Teacher to give the Pupil the proper time of the movement.

2 1 3 2 1 4 2 1 4 2 4 2 4

The following exercise is intended to practise the Pupil upon dotted notes, where it should be observed that the semiquaver after the first quaver in the bar should never be produced by the action of the arm, but merely by the wrist of the bow hand, and also that the semiquaver, throughout the piece, should occupy even a shorter time than that which properly belongs to it.

Syncopated notes are those, which are drawn on from one to another, and often driven forward into the next bar. In order to learn how to make syncopated notes properly, the middle crotchets in the bar must be considered as slurred quavers. When, for instance, the bar is written thus:  it may be considered as noted thus:  and so executed, that in playing the third and fifth quaver, a slight jerk be given to the Bow.

Three systems of musical notation for piano, each consisting of a treble and bass staff. The first system includes fingerings 3, 4, 1, 2, 3, 4 and accents. The second system includes fingerings 3, 4, 1, 2, 3, 4. The third system includes fingerings 2, 4.

THE APPOGGIATURA.

The Appoggiatura always takes away one half of the time belonging to the note before which it stands, and is known by being written smaller than the other notes, and with its tail turned upwards. If an appoggiatura stand before a dotted note, the dot does not affect the appoggiatura, which must occupy no more time than if the note were not dotted. When an appoggiatura is marked with a ♯ or a ♭, this ♯ or ♭ has reference only to the appoggiatura, and not to the following note. I have furnished some examples of this case. If the appoggiatura be required to be made shorter than according to the rule, it must be so specially signified. The appoggiatura must always be slurred with the note before which it stands.

Two systems of musical notation for piano in 3/4 time. The first system is labeled "TEMPO DI MINUETTO." and includes fingerings 2, 3, 4. The second system includes fingerings 2, 4, 2, 3, 4.

In the same manner as 2nda shows that a passage is to be played upon the second string, so 3za stands for the third, or G string; and 4ta for the fourth or C. When the passage is of some length, many Composers write "sulla terza corda," or "sulla quarta corda." But as this expression often affects a single note only, it is unnecessary to write the words at full length, but it is sufficient to use 1ma, 2nda, 3za, 4ta. Indeed, the same thing is frequently expressed by merely using the figures 1, 2, 3, 4. If the No. of the string upon which a note should be played be marked underneath it, and no sign be given of how long the player is to continue upon the same string, the expression then holds good only for the note thus marked.

First system of musical notation, consisting of two staves. The upper staff contains a treble clef, a key signature of two sharps (F# and C#), and a 2/4 time signature. The music features a series of chords and melodic lines with slurs and accents. The lower staff contains a bass clef and continues the piece with a similar melodic and harmonic structure.

Second system of musical notation, consisting of two staves. The upper staff contains a treble clef, a key signature of two sharps, and a 2/4 time signature. The tempo marking "POCO ALLEGRETTO." is printed below the first staff. The music continues with various rhythmic patterns and melodic phrases. The lower staff contains a bass clef and provides a harmonic accompaniment.

Third system of musical notation, consisting of two staves. The upper staff contains a treble clef, a key signature of two sharps, and a 2/4 time signature. The music features complex chordal textures and melodic lines. The lower staff contains a bass clef and continues the piece with a steady rhythmic accompaniment.

Fourth system of musical notation, consisting of two staves. The upper staff contains a treble clef, a key signature of two sharps, and a 2/4 time signature. The music continues with various rhythmic patterns and melodic phrases. The lower staff contains a bass clef and provides a harmonic accompaniment.

Fifth system of musical notation, consisting of two staves. The upper staff contains a treble clef, a key signature of two sharps, and a 2/4 time signature. The music features complex chordal textures and melodic lines. The lower staff contains a bass clef and continues the piece with a steady rhythmic accompaniment.

Sixth system of musical notation, consisting of two staves. The upper staff contains a treble clef, a key signature of two sharps, and a 2/4 time signature. The music continues with various rhythmic patterns and melodic phrases. The lower staff contains a bass clef and provides a harmonic accompaniment.

for the Violoncello.

The first system of musical notation consists of two staves. The upper staff is in bass clef with a key signature of two sharps (F# and C#). It contains a melodic line with various ornaments, including a trill on the first measure and a grace note on the second. Fingerings are indicated by numbers 1, 2, 3, and 4. The lower staff is in bass clef and provides a harmonic accompaniment with eighth and sixteenth notes.

The second system of musical notation consists of two staves. The upper staff continues the melodic line with a trill and a grace note. The lower staff continues the accompaniment with eighth notes.

The third system of musical notation consists of two staves. The upper staff features a melodic line with a trill and a grace note. The lower staff continues the accompaniment with eighth notes.

The fourth system of musical notation consists of two staves. The upper staff has a melodic line with a trill and a grace note. The lower staff continues the accompaniment with eighth notes.

The fifth system of musical notation consists of two staves. The upper staff has a melodic line with a trill and a grace note. The lower staff continues the accompaniment with eighth notes.

The sixth system of musical notation consists of two staves. The upper staff has a melodic line with a trill and a grace note. The lower staff continues the accompaniment with eighth notes.

First system of musical notation. The upper staff is in treble clef with a key signature of two sharps (F# and C#). It contains a series of eighth and sixteenth notes with various fingerings (1, 2, 3, 4) and slurs. The lower staff is in bass clef with a key signature of two sharps, containing a simple harmonic accompaniment of quarter and eighth notes.

Second system of musical notation, continuing the piece. It features similar notation to the first system, with complex fingering patterns in the upper staff and a steady accompaniment in the lower staff.

Third system of musical notation. The upper staff includes a tempo marking "TEMPO MODERATO." in the lower left. The notation continues with various rhythmic values and fingerings.

Fourth system of musical notation. The upper staff shows more intricate fingering and slurs, while the lower staff maintains the accompaniment.

Fifth system of musical notation. The upper staff features a prominent trill-like figure and complex fingering. The lower staff continues with the accompaniment.

Sixth system of musical notation, the final system on the page. It concludes with a double bar line. The notation includes various rhythmic patterns and fingerings throughout both staves.

In using the shift, the music which will present the greatest difficulty to the Pupil, will be that which is written in the keys of B♭, E♭, A♭, and D♭. The reason of this is, that in these keys, if the player be required to produce only a few notes gracefully, the fingering must be changed every moment, and it is impossible to lay down any fixed rule which will provide for every case that may present itself. For this reason, I have marked in these different scales, the G, A♭, C and D♭, to be taken with the fourth finger, in order to accustom the Pupil from the beginning, in these cases to this expedient, which will be found of great use in accompanying.

Here follow some exercises in the flat keys. The Pupil will make himself acquainted with the fingering far better by means of a tangible melody, than by any given rules, as these latter can only provide for single cases.

ANDANTE.

1 3 4 1 1 0 4 3 1 1 2 1 4 1 4 3 2 1 4 2 2 0 2 1 2 1 2 4 0 3

2a 3a

First system of musical notation, consisting of two staves. The upper staff contains a complex melodic line with numerous fingerings (e.g., 1 2 3 2 0, 3 1 2 4, 4, 1, 2, 1, 4 3, 4 2 1 0) and dynamic markings such as *2a* and *1a*. The lower staff provides a harmonic accompaniment.

Second system of musical notation, consisting of two staves. The upper staff continues the melodic line with fingerings like 1 2 1, 1 4 2 1, 3 4 1, 0 3 4, 0 1 2 4 1, 0 3 4, 0 2 1. The lower staff continues the accompaniment.

Third system of musical notation, consisting of two staves. The upper staff begins with a dynamic marking of *55* and includes the instruction *CANTABILE.* Fingerings include 3 1, 4, 1 1, 1 1, 1 1, 3 2, 4 2, 3 1, 4 3, 1 1. The lower staff continues the accompaniment.

Fourth system of musical notation, consisting of two staves. The upper staff features a melodic line with fingerings such as 1 2 3 2 1 0, 2, 1 2 3 4 2 1, 4 2 1, 4 2 1, 3 2 1, 2 3 4. The lower staff continues the accompaniment.

Fifth system of musical notation, consisting of two staves. The upper staff continues the melodic line with fingerings like 1 2 3 4 2 1, 1 1 4 2 1, 1. The lower staff continues the accompaniment.

Sixth system of musical notation, consisting of two staves. The upper staff continues the melodic line with fingerings such as 1 2 3 1, 2 3 1 2, 2 3 1 2, 1, 4 2 1, 3 1 4 2, 1 1 4 2 4 0. The lower staff continues the accompaniment.

THUMB PASSAGES.

We now proceed to the consideration of the Thumb-passages, and shall first direct our attention to those which belong to the Tenor-clef. The passages which lie higher belong to the Violin-clef, which we shall discuss hereafter.

The mode of holding the hand in playing thumb-passages is less difficult than that required where the thumb is held under the neck. When the hand is once accustomed to a good position, it is not easily lost; and I shall here lay down a very simple means by which it may be attained. Take a thick bottle-cork, and hold it between the thumb and 1st finger, close to the muscle, and so placed that both the fingers may lie asunder, and the other fingers be very little curved, so that they may meet the strings conveniently. The thumb should be bent neither out, nor in, but should make a straight line with the hand. Care should be taken that the fingers in playing be not bent too much inwards, but that they fall on the strings with a slight curvature. The nails of the left hand should be cut short, otherwise the strings will be touched by them instead of by the ends of the fingers. The strings must be pressed down by the fore-joint of the thumb, but only two strings at a time, so as to make a fifth across the strings. One string must exactly cross the joint of the thumb, and the other lie under the middle of the nail. The following drawing will illustrate the above explanation.

The pupil must play with the cork in his hand, until he has accustomed his fingers and thumb to retain the same position without it; for nothing is more injurious than to press the thumb together with the fingers upon the strings. He must endeavor to acquire a sufficient strength in the thumb, as to make it a firm bridge across the strings, without any support from the fingers. The arm must lean gently against the edge of the belly, and the elbow must not be pushed forward, but should be held free and kept back.

The teacher should take the greatest care that the pupil, when playing thumb-passages, keep his hand exactly in the same place. This should be learnt at the very beginning, and he should not follow the example of many Violoncellists, who place the neck of the Instrument upon their shoulder, to play, as they imagine, with greater convenience, or stretch forward their feet to see where to place their fingers. This would indeed assist them to play in accurate tune, if the notes were fretted on the finger-board as on the Guitar. To play in tune can be acquired only in two ways: either by an accurate ear, or, where this is defective, by gradual and continual practice.

We shall begin the thumb-passages with the highest position in the Tenor-clef, on the A and D strings; and first, with the scale on these two strings with all the four fingers. The sign for the thumb-passage is 0; a small perpendicular stroke under the 0 distinguishes it from the sign for the open string.

This scale must be practised till the pupil can play it with fluency, after which, he may proceed to the following exercises. In using the 4th finger, the hand must not be brought forward, but the little finger should be stretched out straight, and, when taken off the string, must not be bent together. This is a fault which beginners are but too apt to fall into; and therefore, to remedy the difficulty, it is better to let the little finger lean against the 3d finger.

TEMPO MODERATO.

This example is sufficient to show that the fingering of the Thumb-passages is not difficult. With respect to the fingering of sharps and flats, there is a fixed rule, which is that the note either to be sharpened or flattened must be taken with the same finger as the preceding note. But when the note taken with the thumb is required to be sharpened, the thumb must not be advanced, but the note must be always taken with the 1st finger. The following CHROMATIC SCALE, (a scale of consecutive semitones), distinguished from the DIATONIC, (or scale of whole tones), will illustrate these remarks.

UPWARDS.

DOWNWARDS.

In the following exercises in B minor, the thumb is to remain on the A and D strings. The A \sharp must be taken with the 1st finger.

POCO ALLEGRETTO.

The first system of musical notation consists of two staves. The upper staff is in treble clef with a key signature of two sharps (F# and C#) and a common time signature. It contains a melodic line with various fingerings indicated by numbers 0, 1, 2, and 3. The lower staff is in bass clef with the same key signature and time signature, providing a harmonic accompaniment.

The second system of musical notation consists of two staves. The upper staff continues the melodic line with complex fingerings, including triplets and slurs. The lower staff continues the harmonic accompaniment.

The third system of musical notation consists of two staves. The upper staff features a melodic line with slurs and fingerings. The lower staff continues the accompaniment. The text "2a PATETICO." is written in the left margin of the upper staff.

The fourth system of musical notation consists of two staves. The upper staff has a melodic line with slurs and fingerings. The lower staff continues the accompaniment.

The fifth system of musical notation consists of two staves. The upper staff has a melodic line with slurs and fingerings. The lower staff continues the accompaniment.

The sixth system of musical notation consists of two staves. The upper staff has a melodic line with slurs and fingerings. The lower staff continues the accompaniment.

9 4 3

QUASI ALLEGRO.

The first system of music consists of two staves. The upper staff is in treble clef and the lower in bass clef. The key signature has two sharps (F# and C#), and the time signature is 6/8. The tempo marking 'QUASI ALLEGRO.' is placed between the staves. The music begins with a quarter rest in the bass staff, followed by a series of eighth notes in the treble staff. There are fingerings 9, 4, and 3 indicated above the first few notes.

The second system continues the piece with similar rhythmic patterns in both staves, featuring eighth notes and some slurs.

The third system shows a continuation of the melodic line in the treble staff and a supporting bass line, with some dynamic markings like accents.

The fourth system features a change in the bass line's rhythm, with more prominent quarter notes and rests.

The fifth system includes a triplet of eighth notes in the treble staff and a corresponding bass line.

The sixth system concludes the piece with a final melodic flourish in the treble staff and a steady bass line, ending with a double bar line.

In order that the Pupil be not too much accustomed to have the fingering marked, the following exercises are marked only in those places where I have found it necessary. The place where the thumb is to be used, is always marked on the first note. How long the passage is to continue in that position, is left for the Pupil to discover, but in cases of doubt, the thumb passage is marked under the following notes. It has been already observed, that whenever no particular string is marked in the fingering, the A string must be always used.

In the following Exercise in B \flat major, the thumb must remain across the A and D strings. The Pupil should accustom himself to use the thumb most, if not in all of the keys, so as to play with the same facility as in the common position. There will be no necessity for my proceeding further than two flats in the Examples.

The following Exercise must be played with the thumb upon the D and G. The thumb is so seldom required upon the C string, that it is unnecessary for the pupil to study it at first. The thumb should lie upon the D and G strings in exactly the same position as before upon the A and D. The holding of the hand and fingers remains the same as upon the two first strings. In playing the notes which may occur upon the C string, the thumb must not be removed from its place, but must remain firm in its position. The A taken with the 4th finger, which occurs in the following exercise, must be made upon the D string.

Whenever, in playing thumb-passages, the arm cannot be leaned against the Instrument, it must be held easy and free.

ALLEGRO NON TROPPO.

In order to accustom the Pupil to change from the common position to the thumb-position, and back again, I have annexed the following air, throughout which the fingering is not marked, except when necessary to show the right position in which to take a passage. In playing the two notes with the little finger, the thumb must not be removed from its place.

In changing the hand from the common position to the thumb-position, the Pupil must accustom himself, when playing the last note in the common position, to shift the thumb upon the finger-board, so as almost to push away the finger which made the last note, with the thumb; for, without this management, a break or silence will take place between the two tones, as also from the F to the G, in which the thumb must be used, as well as in all other similar cases.;

ANDANTINO.

Since we may play in the common position, even higher than the upper A, the next exercise includes B in its compass, in playing which note, the thumb must follow the fingers so far until its end comes to lie in the middle of the neck.

ALLEGRETTO MA NON TROPPO.

for the Violoncello.

The first system of musical notation consists of two staves. The upper staff is in bass clef with a key signature of one sharp (F#) and a 2/4 time signature. It contains a melodic line with various fingerings (0, 1, 2, 3) and a first ending bracket labeled '2a'. The lower staff is in bass clef and provides a harmonic accompaniment with chords and single notes.

The second system continues the piece with two staves. The upper staff features a melodic line with fingerings (1, 2, 3, 4) and a first ending bracket labeled '3'. The lower staff continues the accompaniment.

The third system consists of two staves. The upper staff has a melodic line with fingerings (1, 2, 3, 4) and a first ending bracket labeled '3'. The lower staff continues the accompaniment.

The fourth system consists of two staves. The upper staff has a melodic line with fingerings (0, 1, 2, 3, 4) and a first ending bracket labeled '2a'. The lower staff continues the accompaniment.

The fifth system consists of two staves. The upper staff has a melodic line with fingerings (1, 2, 3, 4) and a first ending bracket labeled '2'. The lower staff continues the accompaniment.

The sixth system consists of two staves. The upper staff has a melodic line with fingerings (0, 1, 2, 3, 4) and a first ending bracket labeled '2a'. The lower staff continues the accompaniment and ends with a double bar line.

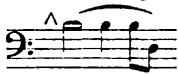

OF ARPEGGIOS.

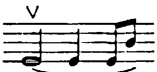

We now arrive at the study of the Arpeggio, a grace peculiarly adapted to the Violoncello, but one which requires much industry and practice to execute neatly. Here, however, it is not my intention to lay a paper of patterns before my readers, to show them with what variety of Bowing the Arpeggio may be made. In order to make the Arpeggio with a light Bow, without which it can never be well executed, the pupil should learn to make it with the whole length of the bow. The Arpeggio is a test of every mode of Bowing, and discovers at once if the player execute with a stiff or free arm. For, whoever can use his bow from the point to the nut without laborious exertion, cannot possibly play stiffly.

Arpeggios usually begin with the lower note, and must be first practised with the up-Bow ; the following is the most usual.

But in order to make them well, they should be begun from the upper note, and in the following manner. To acquire the

free use of the whole bow in making them, take B upon the A string, as in Figure I.  Draw the bow to the point, as in Figure 2., and then turn the wrist back without moving the arm, until the bow just touches the D ; then to make

the up-bow, turn the wrist back so far as that the bow may fall on the G string :  Draw the bow softly from the

point to the nut ; then turn the wrist a little forward, so that the bow may just touch the D string ; and in making the down-bow, bring it a little farther forward, so that the bow may lie as shown in Figure I ; and continue this practice till it can be done without the slightest effort. Here we should avoid the least exertion of the shoulder as well as in the arm, for both the one and the other should be held perfectly free, and devoid of all stiffness.

In making the up-Bow, the wrist may be directed a little upwards by the fore-arm, so that the point of the bow may fall slightly downwards. It is a great fault to press down the bow hand in making the up-bow, as then the point of the bow must necessarily be directed upwards. In making the down-bow, we should take great care that the elbow (of the bow-arm) be not raised, but that the hand be kept at an equal distance from the rest of the body, until the arm becomes straight.

When the pupil can play the above study, slowly, and with a free arm, he will find the following exercise of service.

It has been already shown how the arm should be held in making the Arpeggio with the up-Bow. The first two notes, G and D, should be made as before ; B and E must be made merely with the wrist, without removing the arm from its position. The down-bow must be made as shown in the former example. The two detached notes G and D, must also be made with the wrist, retaining the former position of the arm. This may be represented in notes, thus :

We next proceed to the Arpeggio made with three slurred notes. This must be always begun, whether from an upper or lower note, with a down-Bow, thus :

The chief thing to be observed in practising this Arpeggio, is that it be made with the whole length of the bow. In doing this, we must remember, that the whole of the Bow should be used for the first three notes, and that the fourth note, which is

made with an up-bow, should be also taken with the whole bow. The bow should be drawn gently and lightly across the strings, which is easy to do with the up-bow, though the down-bow will naturally fall heavier upon the strings. The advantage of making them with the whole Bow will be perceived afterwards. Those Arpeggios which include four notes are divided in half, to give a graceful swing to the bow.

These also must be practised with the whole length of the bow, so that it be changed only at the point or nut. The greatest length of the bow must fall on the lower G, so that the three upper notes do not take up the half of the bow. During this practice, the elbow must be brought neither backwards nor forwards, but every thing must be managed with the wrist.

As soon as the Pupil is acquainted with the Arpeggios which require the whole length of the bow, he may proceed to study those which are played with the half-bow.

These examples must be begun with the up-bow, taken from the very point of the bow. In playing 1 and 2, the bow must be directed upwards, without removing the elbow from its natural position. The point of the bow must be laid on the strings, and the bow drawn down almost to the middle; 3 and 4 are made merely with the wrist of the hand, and with a very small part of the bow. In playing 5, the hand should be brought most forward, so that the stick of the bow may almost touch the A string; and then in playing 6, the bow should be drawn to the point. The longer the bow in playing 6, the more finished is the arpeggio.

The next exercise is somewhat more difficult.

This exercise, as well as the former, should be begun with the up-bow. In playing 1 and 2, the bow must be used to the middle; 3 and 4 must be made quite short, and with the wrist; in 5 and 6, the bow must be drawn from the nut quite up to the point, in doing which, the wrist must be a good deal raised.

The Arpeggios on all four strings may be made either with the whole, or half-bow. Here we may remark, that if the bow be laid upon the A string, as in Figure L, and the wrist be turned back until the hairs of the bow lie flat on the C string, it will then be easily perceived, how the bow-hand must be managed in making these Arpeggios. But care must be taken when the bow comes to the point, and the Arpeggio is to be made with the whole length of the bow, that the elbow does not protrude behind the back.

For the same arpeggio with the half-bow, divide the bow into four parts, and use only the two middle quarters. The Pupil will then find by dint of practice, he will be able to make the arpeggio with the wrist only, and without moving the elbow either backwards or forwards.

The arpeggios with the detached-bow, must be made only with the middle of the bow, and very little of it used for the up-bow.

This sort of arpeggio, however, can be made only in a quick movement, because the bow itself must partly produce the

spring. I do not recommend the young Pupil to study this arpeggio, as it is apt to give him a stiff arm, which, as I have often before said, is diametrically opposed to neat playing. It has a much better effect when played in detached notes with the up-bow, where each note occupies but a small portion of the bow, used at about a hand's breadth from the end of it.

This arpeggio is introduced in the "Rondo alla polacca" of my Concerto in E minor.

Here follows another divided arpeggio. This should be made with half the bow, i. e. from the middle to the point.

When the Pupil is able to play all the Exercises on the Arpeggios here given, with the whole, as well as with the half-bow, with lightness and ease, and without any awkwardness or stiffness of arm, he will then find no difficulty in managing every other species of them.

SECOND PART.

OF THE VARIOUS CLEFS, AND MORE ESPECIALLY OF THE VIOLIN CLEFS.

A practice has hitherto prevailed, of playing those notes which are written for the Violoncello in the Violin-Clef, an octave lower than the pitch of the Violin. Far from being inclined to sanction such a practice, I am decidedly and strongly opposed to it. No one would think of playing the notes of the Contr' alto or Soprano-clef an octave lower, or those of the Tenor-clef an octave higher than they are played upon other Instruments, or are sung by the human voice, since these clefs are borrowed from the human voice, and must be always referred to it as a standard. The Violin-clef should be treated in the same way, since there is no apparent reason which can justify the practice of playing the notes in this clef, an octave below; more especially as the notes of which we are here treating, do not lie so high as to render it necessary for convenience sake, to have recourse to the sign *All' octava*. This expression *Sva* is written above those notes which are intended to be played an octave higher, and holds good for all the notes over which the dots are carried on. By adopting this plan, all notes might be written in the Bass-clef, and the sign *Sva* used whenever the music reached beyond the natural compass of the clef. Unfortunately, however, several celebrated Composers have noted the Violin-clef in Violoncello music, an octave higher than it should be played. We cannot with justice reproach these great Masters with ignorance of their art, but we may certainly reprove them for their adoption of a bad habit. Boccherini has used all the clefs employed in Music with the greatest precision. In his works, it is immediately perceived what position the thumb should occupy in playing the Thumb-passage. Thus he noted his music in the Bass-clef as high as the D above the first leger line in the common position. He wrote in the Tenor-clef as high

as the upper D, , but always without using the thumb. For the Thumb-passages he began with the Contr' alto in

B as far as C , he used the Soprano-clef from B to F' , and the Violin-clef from G and up-

upwards . In the Tenor-clef he wrote as far down as the G .

Although, in following this system, the player always knows his position, i. e. where he must use his thumb for a bridge, yet it is very perplexing to be distracted with so many various clefs. Boccherini himself probably felt this disadvantage, for

he afterwards wrote only in three clefs; the Bass, Tenor, and Violin. But in all his writings there is no example of his having written the Violin-clef an octave above; he was too good a composer to admit of three different Violin-clefs in his music. It is true, that, in a later edition of his works, the Violin-clef has been set an octave higher, but it must surely have been done contrary to the wish of this celebrated Master.

There is nothing, however, to prevent an alternate use of the Bass and Tenor clefs. If this were not allowed, it would be necessary to write all those notes in the Bass clef, which were to be played on the C string, and the Tenor would be commenced from the G string. The Tenor would thus obtain an undue extension, and would involve the player in a difficulty if he attempted to play arpeggios on all the four strings. I have always found it expedient to intermix the Bass and Tenor clefs whenever it became indispensably necessary; not to employ the Tenor-clef on the shift higher than D on the A string; and to begin the thumb-passages an octave above the open string. All the notes above this A belong to the Violin-clef, that is, they are the identical notes found upon the Violin. By these means, the player will know in which division of the compass he is playing. Those cases do not often occur which require the Tenor-clef for the thumb-passages higher than the D on the A string.

VIOLIN CLEF.

The last A here written, is the highest note generally produced upon the Violoncello, and this indeed is an Harmonic, a species of note of which we shall presently have to treat. For the present, we shall confine ourselves to a practical acquaintance with the Violin-clef, and we shall begin by treating of the first position usually chosen for the Thumb-passage, B \flat and E \flat , which is a continuation of those pieces in the Tenor-clef which concluded the First Part.

I have already observed, that when it is intended to use the Thumb, the finger which has made the note previous to the Thumb-passage must be pushed from its place by the Thumb, and I consider it useful here to recall this remark to the mind of the reader. The passage at the end of the following exercise, before the last bar, where the notes are marked with two different Bowings, should be played as if there was a short rest after the first Bow which binds the two first notes, and the third note, which is made with the same Bow, must be played quite short. This is a case of frequent occurrence: even where the notes are not marked as in the passage alluded to, every good player will execute the passage as if both the bowings were noted.

ANDANTE CON MOTO.

The first system of musical notation consists of two staves. The upper staff is in treble clef and the lower staff is in bass clef. The key signature has two flats (B-flat and E-flat). The music features a series of eighth and sixteenth notes, with some slurs and accents. Fingerings are indicated by numbers 1, 2, and 3.

The second system of musical notation consists of two staves. The upper staff is in treble clef and the lower staff is in bass clef. The key signature has two flats. This system includes a second ending marked '2a' with a wavy line underneath. Fingerings are indicated by numbers 0, 1, 2, and 3.

The third system of musical notation consists of two staves. The upper staff is in treble clef and the lower staff is in bass clef. The key signature has two flats. The system concludes with a double bar line. Fingerings are indicated by numbers 1, 2, and 3.

The only remark to be made on the following exercise, is, with respect to the Octave-Interval at the end. The thumb must slip gently over the strings, till it falls into its proper place. In practising these Octave-Intervals, the player will soon hit the proper position, without being obliged to feel for the note ; for almost every ear can find the Octave, though it may require practice to distinguish the purity of the tone.

The first system of musical notation for the second exercise consists of two staves. The upper staff is in bass clef and the lower staff is in bass clef. The key signature has two flats. The tempo is marked 'POCO ALLEGRO'. The music features a series of eighth and sixteenth notes, with slurs and accents. Fingerings are indicated by numbers 1, 2, 3, and 4. A second ending marked '2a' is present.

The second system of musical notation for the second exercise consists of two staves. The upper staff is in treble clef and the lower staff is in bass clef. The key signature has two flats. This system includes a second ending marked '2a' with a wavy line underneath. Fingerings are indicated by numbers 1, 2, 3, and 4.

for the Violoncello.

The first system of music consists of two staves. The upper staff is in treble clef and contains a melodic line with several slurs and a fingering of '2a' under a note. The lower staff is in bass clef and provides a harmonic accompaniment with a steady eighth-note pattern.

The second system features a treble clef staff with a 4-measure rest at the beginning, followed by a melodic phrase. The bass clef staff continues the accompaniment from the previous system.

The third system shows a treble clef staff with a 4-measure rest, then a melodic line. The bass clef staff continues the accompaniment.

The fourth system has a treble clef staff with a 4-measure rest, followed by a melodic phrase. The bass clef staff continues the accompaniment.

The fifth system features a treble clef staff with a 4-measure rest, then a melodic line. The bass clef staff continues the accompaniment.

The sixth system has a treble clef staff with a 3-measure rest, followed by a melodic phrase. The bass clef staff continues the accompaniment.

System 1: Treble clef (top) and bass clef (bottom). Treble clef contains a half note G4, a quarter rest, a quarter note A4, and a half note B4. Bass clef contains a continuous eighth-note pattern: G3, A3, B3, C4, D4, E4, F4, G4.

System 2: Treble clef (top) and bass clef (bottom). Treble clef contains a half note G4, a quarter note A4, a quarter note B4, and a half note C5. Bass clef contains a continuous eighth-note pattern: G3, A3, B3, C4, D4, E4, F4, G4.

System 3: Treble clef (top) and bass clef (bottom). Treble clef contains a half note G4, a quarter note A4, a quarter note B4, and a half note C5. Bass clef contains a continuous eighth-note pattern: G3, A3, B3, C4, D4, E4, F4, G4.

System 4: Treble clef (top) and bass clef (bottom). Treble clef contains a half note G4, a quarter note A4, a quarter note B4, and a half note C5. Bass clef contains a continuous eighth-note pattern: G3, A3, B3, C4, D4, E4, F4, G4.

System 5: Treble clef (top) and bass clef (bottom). Treble clef contains a half note G4, a quarter note A4, a quarter note B4, and a half note C5. Bass clef contains a continuous eighth-note pattern: G3, A3, B3, C4, D4, E4, F4, G4.

System 6: Treble clef (top) and bass clef (bottom). Treble clef contains a half note G4, a quarter note A4, a quarter note B4, and a half note C5. Bass clef contains a continuous eighth-note pattern: G3, A3, B3, C4, D4, E4, F4, G4.

The following exercise begins with a chord, which must be always made with a down bow. The nut of the bow should be laid close upon the lowest string, and the bow itself swung across the strings so that it may rebound from them, i. e. the chord must be played as if written thus:  where the greatest pressure will fall upon the lower G. All other chords should be played in a similar manner, and it is quite immaterial whether they be played on three or on four strings; but the following note should also be taken with a down-bow. The A in the 20th bar should, in strict propriety, be taken with the third finger; but in this case, to ensure its being accurately in tune, the fourth finger may be used, as the

hand will thus have more firmness in the execution. In the 37th and 39th bars, where the notes, as marked, belong to the fourth string, the thumb must remain, as usual, in its place. The nature of the passage in the 53d bar, will not allow the thumb to be gently slipped over the strings, but in this case, the thumb must take the Harmonic, which is not difficult to catch. In the 55th bar, the thumb must be placed, as marked, upon the G and D strings. I must here again remind the reader that whenever the thumb is marked to be placed upon the A string, it must also take the fifth upon the D; but if the thumb-passage be marked for the second string, it can be discovered only by the nature of the following passage, whether the first or third string should be used with it. With respect to the fourth string, there can be no difficulty.

♩ = 116

ALLEGRO.

1 2 3 4 5

6 7 8 9 10

11 12 13 14 15

16 17 18 19 20

21 22 23 24 25

for the Violoncello.

Musical notation for measures 26-29. The system consists of a treble clef staff and a bass clef staff. Measure 26 has a triplet of eighth notes in the treble. Measure 27 has a quarter note in the treble and a half note in the bass. Measure 28 has a quarter note in the treble and a half note in the bass. Measure 29 has a quarter note in the treble and a half note in the bass.

Musical notation for measures 30-32. The system consists of a treble clef staff and a bass clef staff. Measure 30 has a quarter note in the treble and a half note in the bass. Measure 31 has a quarter note in the treble and a half note in the bass. Measure 32 has a quarter note in the treble and a half note in the bass.

Musical notation for measures 33-37. The system consists of a treble clef staff and a bass clef staff. Measure 33 has a quarter note in the treble and a half note in the bass. Measure 34 has a quarter note in the treble and a half note in the bass. Measure 35 has a quarter note in the treble and a half note in the bass. Measure 36 has a quarter note in the treble and a half note in the bass. Measure 37 has a quarter note in the treble and a half note in the bass.

Musical notation for measures 38-42. The system consists of a treble clef staff and a bass clef staff. Measure 38 has a quarter note in the treble and a half note in the bass. Measure 39 has a quarter note in the treble and a half note in the bass. Measure 40 has a quarter note in the treble and a half note in the bass. Measure 41 has a quarter note in the treble and a half note in the bass. Measure 42 has a quarter note in the treble and a half note in the bass.

Musical notation for measures 43-47. The system consists of a treble clef staff and a bass clef staff. Measure 43 has a quarter note in the treble and a half note in the bass. Measure 44 has a quarter note in the treble and a half note in the bass. Measure 45 has a quarter note in the treble and a half note in the bass. Measure 46 has a quarter note in the treble and a half note in the bass. Measure 47 has a quarter note in the treble and a half note in the bass.

Musical notation for measures 48-51. The system consists of a treble clef staff and a bass clef staff. Measure 48 has a quarter note in the treble and a half note in the bass. Measure 49 has a quarter note in the treble and a half note in the bass. Measure 50 has a quarter note in the treble and a half note in the bass. Measure 51 has a quarter note in the treble and a half note in the bass.

OF HARMONICS.

By many artists, Harmonics are made a prominent feature of the Instrument. It certainly cannot be denied that they possess a peculiar charm where tastefully managed, but they should be considered as musical *Bonbons*, and used sparingly, or the ear will soon tire of them.

Here follows a general view of those notes which can be produced as Harmonics.

The upper line contains the notes as they sound when played as harmonics; and the lower shows the notes as they should be stopped when not played as harmonics. (I have already remarked that the string should be lightly touched, and not firmly pressed by the finger.) The notes here represented, are made on the A string. Those on the D, G, and C strings lie in the same position but a fifth lower respectively. Those tones expressed in the upper line are contained in the lower half of the string, i. e. the half which lies nearest the bridge, the other half comprises those which lie near the nut.

The following notes are produced near the nut.

The last note C# in the descending scale, cannot be produced with any certainty, and below this note no harmonic tone can be clearly produced. Before the last A in the lower-half of the string, there lies an harmonic tone, G, this however is always too flat and consequently cannot be used. Beyond the above-mentioned A, there lie five harmonic tones. These notes cannot, however, be produced very clearly.

In the following exercise, I have introduced all the notes used as Harmonics, which will be quite sufficient for our present purpose. Where harmonics are used in several passages consecutively, the hand should not be removed from the position in which the first passage is begun. This is exemplified in Bars 46 and 47; and again in Bars 74, 75, 76, 77. In executing these passages, the fore-arm should be leaned against the edge of the Violoncello, by which means the hand will be kept in its original position. In the places above alluded to, the harmonics are used alternately with other notes. To execute these passages neatly, the thumb must be kept always in the same direction or position, and care must be taken to keep the fingers well stretched out. Louis Duport, who combined in his playing the greatest taste and execution with the purest and most beautiful tone, particularly excelled in blending harmonics with other notes. He not only used them alternately, but introduced a third species of tone, something between a firm note and an harmonic. This tone he produced, not by pressing the finger tightly against the finger-board, but by bending the string sideways from right to left, by which means he produced a species of harmonic. In this tone, he executed whole passages*, and with the most delightful effect.

From Bar 62 to 67 (which must be played in the common position) the notes must be made harmonics by a gentle pressure of the finger on the string. This will produce the following effect:

* Passages are a certain number of Bars which are repeated, and consist of rapidly-executed notes.

Musical notation for measures 22-25. The system consists of two staves. The upper staff is in treble clef and contains measures 22, 23, 24, and 25. The lower staff is in bass clef and contains measures 22, 23, 24, and 25. Measure numbers 22, 23, 24, 25, and 2 are written below the lower staff. Fingerings (1, 2, 3) and accents (^) are present in the upper staff.

Musical notation for measures 27-30. The system consists of two staves. The upper staff is in treble clef and contains measures 27, 28, 29, and 30. The lower staff is in bass clef and contains measures 27, 28, 29, and 30. Measure numbers 27, 28, 29, and 30 are written below the lower staff. Fingerings (1, 2, 3) and accents (^) are present in the upper staff.

Musical notation for measures 31-34. The system consists of two staves. The upper staff is in treble clef and contains measures 31, 32, 33, and 34. The lower staff is in bass clef and contains measures 31, 32, 33, and 34. Measure numbers 31, 32, 33, and 34 are written below the lower staff. Fingerings (1, 2, 3, 4) and accents (^) are present in the upper staff.

Musical notation for measures 35-39. The system consists of two staves. The upper staff is in treble clef and contains measures 35, 36, 37, 38, and 39. The lower staff is in bass clef and contains measures 35, 36, 37, 38, and 39. Measure numbers 35, 36, 37, 38, and 39 are written below the lower staff. Fingerings (1, 2, 3) and accents (^) are present in the upper staff.

Musical notation for measures 40-45. The system consists of two staves. The upper staff is in treble clef and contains measures 40, 41, 42, 43, 44, and 45. The lower staff is in bass clef and contains measures 40, 41, 42, 43, 44, and 45. Measure numbers 40, 41, 42, 43, 44, and 45 are written below the lower staff. Fingerings (1, 2, 3, 4) and accents (^) are present in the upper staff.

Musical notation for measures 46-51. The system consists of two staves. The upper staff is in treble clef and contains measures 46, 47, 48, 49, 50, and 51. The lower staff is in bass clef and contains measures 46, 47, 48, 49, 50, and 51. Measure numbers 46, 47, 48, 49, 50, and 51 are written below the lower staff. Fingerings (1, 2, 3) and accents (^) are present in the upper staff.

for the Violoncello.

71

Musical notation for measures 52-55. The upper staff contains a melodic line with fingerings: 1 4 1 4 1 1 2 1 2 4 2 1 3. The lower staff contains a bass line. Measure numbers 52, 58, 54, and 55 are indicated below the staves.

Musical notation for measures 56-59. The upper staff contains a melodic line. Measure numbers 56, 57, 58, and 59 are indicated below the staves.

Musical notation for measures 60-64. The upper staff contains a melodic line with fingerings: 1 4 2 1 3 3 1 3 4 3. A "Har." marking is present above measure 62. The lower staff contains a bass line. Measure numbers 60, 61, 62, 63, and 64 are indicated below the staves.

Musical notation for measures 65-69. The upper staff contains a melodic line with fingerings: 3 4 4 4 3. The lower staff contains a bass line. Measure numbers 65, 66, 67, 68, and 69 are indicated below the staves.

Musical notation for measures 70-74. The upper staff contains a melodic line with fingerings: 3 2 0 4. The lower staff contains a bass line. Measure numbers 70, 71, 72, 73, and 74 are indicated below the staves.

Musical notation for measures 75-79. The upper staff contains a melodic line with fingerings: 0 0 1 2 3 2 0 0 1 2 3 1 0 2 0 3 1 0 2 0 0 0 0 3 0 3. The lower staff contains a bass line. Measure numbers 75, 76, 77, 78, and 79 are indicated below the staves.

for the Violoncello.

Musical notation for measures 10-13. The system consists of two staves. The upper staff is in treble clef with a key signature of one sharp (F#) and a common time signature. It contains a complex melodic line with triplets, slurs, and fingerings (1, 2, 3, 4). The lower staff is in bass clef and contains a simpler accompaniment line. Measure numbers 10, 11, 12, and 13 are printed below the staves.

Musical notation for measures 14-16. The system consists of two staves. The upper staff is in bass clef with a key signature of one sharp (F#) and a common time signature. It contains a complex melodic line with slurs and fingerings (1, 2, 3, 4). The lower staff is in bass clef and contains a simpler accompaniment line. Measure numbers 14, 15, and 16 are printed below the staves.

Musical notation for measures 17-20. The system consists of two staves. The upper staff is in treble clef with a key signature of one sharp (F#) and a common time signature. It contains a complex melodic line with slurs and fingerings (1, 2, 3, 4). The lower staff is in bass clef and contains a simpler accompaniment line. Measure numbers 17, 18, 19, and 20 are printed below the staves.

Musical notation for measures 21-25. The system consists of two staves. The upper staff is in treble clef with a key signature of two sharps (F#, C#) and a common time signature. It contains a complex melodic line with slurs and fingerings (1, 2). The lower staff is in bass clef and contains a simpler accompaniment line. Measure numbers 21, 22, 23, 24, and 25 are printed below the staves.

Musical notation for measures 26-30. The system consists of two staves. The upper staff is in treble clef with a key signature of two sharps (F#, C#) and a common time signature. It contains a complex melodic line with slurs and fingerings (1, 2, 3, 4). The lower staff is in bass clef and contains a simpler accompaniment line. Measure numbers 26, 27, 28, 29, and 30 are printed below the staves.

Musical notation for measures 31-34. The system consists of two staves. The upper staff is in treble clef with a key signature of one sharp (F#) and a common time signature. It contains a complex melodic line with slurs and fingerings (1, 2, 3, 4). The lower staff is in bass clef and contains a simpler accompaniment line. Measure numbers 31, 32, 33, and 34 are printed below the staves.

Romberg's School

Musical notation for measures 35-39. The system consists of a treble clef staff and a bass clef staff. Measures 35, 36, 37, 38, and 39 are indicated by numbers below the bass staff. The music features a melody in the treble staff and a bass line in the bass staff, with various rhythmic values and accidentals.

Musical notation for measures 40-42. The system consists of a treble clef staff and a bass clef staff. Measures 40, 41, and 42 are indicated by numbers below the bass staff. The music continues with a melody in the treble staff and a bass line in the bass staff.

Musical notation for measures 43-45. The system consists of a treble clef staff and a bass clef staff. Measures 43, 44, and 45 are indicated by numbers below the bass staff. Fingerings are indicated by numbers 0, 1, and 2 above notes in the treble staff.

Musical notation for measures 46-48. The system consists of a treble clef staff and a bass clef staff. Measures 46, 47, and 48 are indicated by numbers below the bass staff. Fingerings are indicated by numbers 0, 1, and 2 above notes in the treble staff.

Musical notation for measures 49-51. The system consists of a treble clef staff and a bass clef staff. Measures 49, 50, and 51 are indicated by numbers below the bass staff. The music features a melody in the treble staff and a bass line in the bass staff.

Musical notation for measures 52-54. The system consists of a treble clef staff and a bass clef staff. Measures 52, 53, and 54 are indicated by numbers below the bass staff. Fingerings are indicated by numbers 1, 2, and 3 above notes in the treble staff.

Musical notation for measures 55-58. The system consists of two staves. The upper staff is in treble clef with a key signature of one sharp (F#) and a common time signature. It contains a melodic line with various fingerings (0, 2, 4, 3, 2, 1) and a 'Dac' marking above measure 55. The lower staff is in bass clef with the same key signature and time signature, providing a harmonic accompaniment. Measure numbers 55, 56, 57, and 58 are printed below the lower staff.

Musical notation for measures 59-61. The system consists of two staves. The upper staff is in treble clef with a key signature of one sharp (F#) and a common time signature. It contains a melodic line with various fingerings (0, 2, 1, 2, 4, 2, 1, 2, 4). The lower staff is in bass clef with the same key signature and time signature, providing a harmonic accompaniment. Measure numbers 59, 60, and 61 are printed below the lower staff.

Musical notation for measures 62-64. The system consists of two staves. The upper staff is in treble clef with a key signature of one sharp (F#) and a common time signature. It contains a melodic line with various fingerings (0, 1, 2, 1, 2, 1, 3, 2, 1, 2, 1). The lower staff is in bass clef with the same key signature and time signature, providing a harmonic accompaniment. Measure numbers 62, 63, and 64 are printed below the lower staff.

Musical notation for measures 65-67. The system consists of two staves. The upper staff is in treble clef with a key signature of one sharp (F#) and a common time signature. It contains a melodic line with various fingerings (4, 1, 4, 2, 3, 1, 4, 1, 4, 1, 4, 1). The lower staff is in bass clef with the same key signature and time signature, providing a harmonic accompaniment. Measure numbers 65, 66, and 67 are printed below the lower staff.

Musical notation for measures 68-71. The system consists of two staves. The upper staff is in treble clef with a key signature of one sharp (F#) and a common time signature. It contains a melodic line with various fingerings (4, 1, 4, 2, 3, 1, 4, 1, 4, 2, 1, 1, 3, 0, 3). The lower staff is in bass clef with the same key signature and time signature, providing a harmonic accompaniment. Measure numbers 68, 69, 70, and 71 are printed below the lower staff.

Harmonic tones may be also produced in the common position, by a tight pressure of the first finger, thus :

Musical notation for harmonic tones. The system consists of two staves. The upper staff is in treble clef with a key signature of one sharp (F#) and a common time signature. It shows a sequence of notes with fingerings 0, 4, 0, 0, 0, 4, 0. The lower staff is in bass clef with the same key signature and time signature, showing a sequence of notes with fingerings 2a, 1a, 2a. The text 'which sound thus :' is written between the staves, followed by a treble clef staff showing the resulting harmonic tones.

DOUBLE STOPS.

Double-Stops are much more difficult upon the Violoncello than upon the Viola, as the Violin player can make two Thirds without changing the position of the hand upon his Instrument, whilst the Violoncellist can make but one. (The open strings in either case are not reckoned.) With respect to the shift, both Instruments are on a par. But the Violoncellist can never succeed in acquiring the same facility as the Violinist in playing double-stops, because he is obliged so frequently to alter the position of his hand. I subjoin the following exercise as a trial of the Pupil's skill in executing double-stops, though I would by no means advise him to over-fatigue himself in its study, as it would then do him more harm than good. In order to play double-stops with effect, they must be executed with great facility; and as the fingering is here exceedingly difficult, I have marked it upon every note.

$\text{♩} = 72.$

ANDANTE MODERATO.

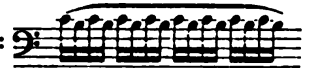

THE PIZZICATO.

The word "Pizzicato" signifies *pinched*. The term is used musically to mean that the string should be pulled with the first or second finger of the right hand, from left to right. When the pizzicato is used for single notes, the thumb should be placed upon the finger-board near the C string, and the bow should be so held that the nut may lie in the palm of the hand, and be held tight by the third and fourth finger. This is the most convenient way of holding the bow, in order that as soon as the pizzicato is finished, it may be returned to its usual position in the hand when the sign "col' arco" is marked. "Col' arco" signifies "with the bow," that is, played in the usual manner, with the hairs of the bow drawn across the strings. In playing *pizzicato*, the point of the bow should be directed upwards.

If chords occur such as , the B should be pulled with the second, and the D with the first finger, and the G should be pulled with the thumb, in a contrary direction to the two fingers. When chords consisting of four notes occur, as , the highest note, C must be taken in the same way, with the second finger, the E with the first, and the G and C pulled with the thumb, in an opposite direction. The place on the string on which to produce the clearest toned pizzicato, is at about a thumb's breadth from the end of the finger-board, towards the bridge.

OF GRACES.

As the shake is the most beautiful, so it is the most important of the Graces. Whenever the sign $\#$ (contracted for trill) is placed over a note, it signifies that the note immediately above the former, should be struck alternately with it several times, and that this should continue during that time which is due to the value of the note over which the sign stands. Thus, the

following expression,  if the time be Allegro, should be executed as if written thus: 

which represents the degree of rapidity with which the shake should be made. If the time of the movement should be slower, the shake must not partake of its slowness, but must always be played with equal rapidity, or it will otherwise produce a bad effect. On the Violin, however, some difference in the rapidity is allowed, as, in the Allegro movement, the Violinist can shake faster than the Violoncellist. This is caused by the pitch being so much lower on the Violoncello than the Violin, and the Violoncellist must also lift the finger which makes the shake, higher from the string than is necessary for the Violin player. The lower down upon the string the shake is required to be made, the more slowly must the note be struck. On the upper part of the Instrument, the shake may be made almost as rapidly as upon the Violin.

THE PREPARATORY AND RESOLVING NOTES OF THE SHAKE.

The resolving notes of a shake, are two small notes, one below, and the other on the same degree with the note shaken,

as: . If the movement be Adagio (a slow time) and the first note of the following bar should descend; in order that the shake may not finish too abruptly, another note is placed between the two above-mentioned, thus: 

and this shake, when it concludes the phrase, should be always played with an up-bow, and should include the resolving notes in the same bow. Many who are unacquainted with what they are playing, and who, consequently, do not know how it should be played, frequently make the shake with a down-bow, which should never be done except where the phrase is incomplete. If the upper note (with which the shake is made) should stand before the shaken note, the player, by way of preparing the shake, must first sound the preceding note, thus:

The Pupil will find the practice of the long shake extremely useful; especially when a Pause occurs, and a cadence is required to be made, that is, on the Pause, which is marked with a curve and dot \curvearrowright placed over a note, and which note must then be held out beyond its usual time. When arrived at the pause, and before he comes to the shake, the performer executes a short passage *ad libitum*, the shake is then held on beyond its usual time, and its resolving notes are played slower than usual, in order that those who are accompanying may fall into the following Bar at the same time with the Player.

THE CADENCE.

To give the Pupil an idea of the nature of a Cadence, I annex the following example, remarking at the same time, that by many players they are extended to a much greater length.

In making the shake, the bow should be drawn slowly from the point to the nut, and the resolving notes made when the string is close upon the nut. The following exercise will practise the fingers in the shake.

In the above examples, the first note must be firmly held on with the finger, and the second must make the shake.

The longer the shake can be continued, the more useful will be the practice. The player must be particularly careful to avoid all stiffness in the finger which makes the shake, and should take care that there be no effort observable in its execution, otherwise, the exercise will do more harm than good. The finger which makes the shake should always fall gently and easily on the string, and the higher the finger is lifted from the string, the more distinct will be the shake. The Pupil should accustom himself, from the beginning, to let the finger fall exactly in the same spot, and should take care to avoid that bad habit common to so many Players, of commencing the shake with a semitone, and finishing it in a whole tone.

It is unnecessary to practice shakes upon the G and D strings. Whoever can execute them with facility upon the A, will find no difficulty in making them upon the other two strings. On the C string they are seldom used, and wherever they do occur, they will offer no difficulty to the Player. The shake, however, is most effective when used on the shift. In order to learn how to make the beat forcibly, the two notes of which the shake is composed, should be played, at first, not of the same length, but the upper note should be made much shorter, and the shake practised as represented in the notes below.

In making the upper note short, the finger must not be held firm on the finger-board, but should be immediately taken off the string, and not held straight, but slightly curved. The higher the finger can be raised from the string, the finer and more powerful will be the shake. The fourth only (the little finger) should be held straight when jerked off the string. When some dexterity in this practice has been acquired, the time of the beat should be doubled. The exercise requires great patience, as it is far from easy to acquire facility in its execution. But it must be remembered, that whoever has bestowed proper care and time upon the study of the shake, will be able to execute all other graces and ornaments with much greater facility than he who has practised it merely in a superficial manner.

I now proceed to the consideration of the double-shake, which requires great dexterity to execute with neatness, the more especially, as its resolving notes can never lie in the same position with the shake itself, thus:

In this shake, the second finger must remain fixed in its place. In order to execute it without changing the position of the hand

for the resolving notes, it would be necessary to make the shake with the 2d and 4th fingers. For this, however, the Pupil would require much more facility than he can have hitherto acquired, as the following consecutive Thirds are very difficult of

execution. 

If it be required to raise or depress the upper note of a shake, when there is no

mark to that effect in the signature, the sharp \sharp , or flat \flat , is placed close above the shake: for example, a shake in the key of

C major, made with B and C sharp, is noted thus:  and with A and B flat, thus:  If these signs are

not marked, our ear must guide us to the right tone. I must now call the reader's attention to the Continued Shake, though this is a grace better adapted to the Violin than to the Violoncello, for which reason it does not often occur upon the latter Instrument.

THE CONTINUED SHAKE.

The Continued Shake is a shake held on for several consecutive notes, of which the last only requires resolving notes, and the others must be played as if slurred together. This is difficult to perform in the common position on the Violoncello, since, in that position, all the notes cannot be shaken with the same finger, but the finger must be changed according as the Interval may be a Major or a Minor Second.

This is not necessary on the shift, and consequently it is here less difficult to execute. A passage of this description written

thus:  should be executed in moderate time, thus: 

Even if no Bowing be marked above such a passage, the notes must be always played in one Bow, and without any pressure of the bow on the string in the change from one note to another. If the phrase be not complete, the resolving notes may, for the sake of ornament, be made a Minor second, but where the shake finishes the phrase, the resolvents must form a Major second.

On the Shift  they must conclude with a Major second, because the thumb must here remain fixed in its position.

OTHER GRACES.

The other graces are, 1st, the Passing-shake \sim ; 2d, the Beat \times ; 3d, the Turn ∞ , or \hookleftarrow ; 4th, the Quick Turn; and 5th, the Tremolo, (vibration or close shake) $\sim\sim\sim$. They are executed as follows:

Of these, Nos. 2 and 3 are become quite obsolete, as they are now considered to savor too much of stiffness and pedantry; and No. 4 is no longer played in the form here represented. Instead of dotting the last note, its length is given to the first, even though it be not so expressed in the notation.

THE APPLICATION AND METHOD OF EXECUTING THE VARIOUS GRACES.

No. 1. The Passing-shake, (which should more properly be denominated the jerk, as it is totally different from the shake,) is executed with effect only in Allegro movements, where if several notes are slurred in one Bow, a break between every two must be perceptible, though no change of the bow must be made.

thus:  must be executed as if written: 

Whenever the passing shake occurs in Adagio, Lento, Cantabile, or Andante movements, no break between the notes must be made, nor should they be played too harshly or rapidly, but should be nicely blended together.

2. The Beat is no longer found in its original form, but whenever the Composer wishes to express it in his Music, he writes it down in small notes.

3. The Turn is made in two ways, either from above or below. When written thus :  it should be executed thus :  ; if on the other hand, thus :  it should be played 

There are, however, some Composers, (among whom I include myself,) who write in such haste, that they do not take the trouble to mark this grace in such a way as to show whether they intend it to be executed from above or from below. They invariably either use but one sign, and leave the player to discover how the grace is to be executed, or else they write the sign so illegibly that it is next to impossible to guess its real meaning. I shall therefore here lay down a more certain rule for this case, and one upon which the player may always depend. If the note which follows be higher than the one marked with the sign, the Turn must be made from above ; if lower, the Turn must be taken from below.

From above,  From below,  If a note be dotted, and a turn be placed above the dot, the turn must be made on the dot ; but if the sign stand over the note itself, the note must be separated into two parts, thus :  When a note used in the turn is required to be raised or depressed a semitone, and is not so marked in the signature, a sign either of a sharp, flat, or natural, is placed above or under the sign of the turn ; thus : with a sharp,  with a flat,  with a natural, 

This also is often not marked ; and it is frequently left to the Player's ear to decide upon what Interval he should use in making the turn. Those who are naturally endowed with musical feeling can seldom err in such a case, though it may be proper to mention, that, whenever possible, it is advisable to make the turn with a minor Third. But when the grace consists of three semitones, it is absolutely necessary that it should be so marked. On the shift, the turn is always more difficult to execute than in the common position, and the length of time employed in making it must always be regulated by the relative value of the note over which the turn is placed.

The Close Shake, or Tremolo, is produced by a rapid lateral motion of the finger when pressed on the string. When used with moderation, and executed with great power of bow, it gives fire and animation to the tone ; but it should be made only at the beginning of the note, and ought not to be continued throughout its whole duration.

Formerly, the Close Shake was in such repute, that it was applied indiscriminately to every note of whatever duration. This produced a most disagreeable and whining effect, and we cannot be too thankful that an improved taste has at length exploded the abuse of this embellishment.

The Tremolo above mentioned must, however, be distinguished from the Tremolo used by Orchestras in accompanying Operas or Cantatas. In these latter cases, it most frequently occurs in Recitativos, as is produced by the rapid reiteration of the same note or chord, with a very short Bow, which must continue for the length of time due to the note or notes over which the sign (Tremolo) is marked.

6. The expression PORTAMENTO DI VOCE (the sustaining and combining of notes) is applicable in the same manner to Instrumental as to Vocal Music, and signifies the gliding from one note to another, by which means the most strongly accented notes of the Air are blended together with those which precede them, and an agreeable effect produced. This takes place in the 21st Bar of the following "LENTO CANTABILE," where the blending is marked by a small note.

In the following piece, I have introduced Turns of various kinds ; some to be made from above, and others from below. In Bars 1 and 2, they must be made from above, and with a minor third, thus :

Romberg's School

If the turn, with its sign (of $\#$ or \flat), stand over the note, the raising or depression is not resolved in the principal note, but if, on the other hand, they are written in full, they must be again resolved into their former degree.

In bars 9 and 10, the turns are made from below ; as :

Bar 4, (which,

as it is not a concluding cadence, may be taken with a down-bow,) should be played, as follows :

The small notes written

above, must not be counted in the time of the bar, but should be considered as a part of the crotchets, before and after which they stand.

The shakes in the 7th bar are imperfect shakes, as they will not admit of resolving notes, and must be played as follows :

Bar 15 is an

example of the turn between two notes, as :

In Bar 17, the turn is placed upon the note, and must be reckoned for one half.

In the 26th Bar, they are again placed between the notes.

The 27th Bar requires a peculiar management. It must be executed as if a semiquaver rest were placed between the two Bowings, which are made with one stroke of the Bow, and, during this rest, the bow should be taken off the strings, and drawn

a little back ; this would be expressed in notes, thus :

The 33d and 34th Bars are played as those preceding.

In playing the 38th Bar, the dotted note, D, should be considered as having a short rest after it ; the same should be observed in playing the G in the same Bar, though the whole crotchet must be taken with one Bow.

LENTO CANTABILE.

In order that the Pupil may acquire facility and neatness in executing the various Bowings contained in the following "*Allegro con fuoco*," I should recommend him a diligent practice of the following Bowing, which will improve him in the quick and easy execution of detached notes: for the beauty of Violoncello-playing chiefly depends on the grace and ease of the execution; the moment that anything cramped or stiff appears in the performance, it is immediately deprived of its most attractive charm.

Another condition indispensable to fine playing, is, the power of making a great number of notes in one Bow. To effect this, the Pupil should use the whole length of the bow from nut to point, and, at each end, make a few small notes.

The following exercise upon the A string, may serve for this purpose.

The same may be done upon the D and G strings. The longer the tone is produced, and the shorter the time given to the notes at the end of each bar, the more serviceable will this practice be found. One thing, however, must be particularly remarked, which is, that the notes at the end be made with lightness and ease.

The second finger will be found the best in making the close-shake, for which reason, I have marked it to be used upon the first note of the following exercise, where the passing-shake must be made with the third. The third finger, in strict propriety, should have been used for the first note, but this is not so well adapted to the close-shake. The close-shake must never be held on through the whole duration of the note, otherwise it will fail in its object, which is, to add power to the tone; and should never exceed in time the third part of the value of the note.

Bar 2d.—The passing-shake, when played with effect, is best made with a down-bow, and must be struck with more force than in the former Example, because more spirit is required in this movement, than in the cantabile. It has been already mentioned how it should be made in the *Allegro*.

Bar 6th should be executed more gently, and with the bowing more Legato, only in such a manner that the notes be audibly played two and two together.

From Bar 7th to 10th, should be played as if there was a semiquaver rest between the first C and D sharp, because the C is made with the end of the bow close to the nut, and the D sharp must be taken with the point of the bow. The following sturred notes require almost the whole length of the bow, more particularly the crotchet F, for which purpose, the bow should be drawn rapidly across the strings, but without touching them. Care must, however, be taken not to stiffen the arm, for in that case, all the beauty of the playing will be lost.

Nos. 11 and 12, should not be made with a very long Bow, as should also Nos. 15 and 16.

In No. 17, the G sharp and G takes in almost the whole length of the bow, and the last crotchet should be made as lightly as possible.

From No. 22 to 24, for every half bar, the whole length of the bow should be employed.

In No. 26, the whole length of the bow down to the very point is required for the first A, otherwise there will not be a sufficient quantity left for the up-Bow.

Nos. 29 and 30, are similar to Nos. 7 to 10, but in playing the first, the bow must be drawn nearer to the end.

In 31 and 32.—The first semiquaver and third crotchet in 31, as well as the note which follows the first and third crotchet in No. 32, should be played with a slight accent, to mark the time of the bar.

From 42 to 44, the whole length of the bow should be used; in 50 and 51, only the half-bow; i. e. the half lying in the middle, neither too near the point nor the nut.

In No. 59, (where the passing-shake requires more power, if made with the third finger) 60, 61, and 62, the Passing-shake must be brought well out.

Bar 64.—The double A with the Appoggiatura G sharp upon the D string, was formerly much used by Violoncellists. They could never sound the open A, D, or G strings, without at the same time sounding its unison on the string below, with its appoggiatura.

for the Violoncello.

$\text{♩} = 116.$

ALLEGRO CON FUOCO.

Measures 1-5 of the piece. The upper staff is in treble clef with a key signature of one sharp (F#) and a common time signature (C). It features a complex melodic line with slurs, accents, and fingerings (1, 2, 3, 4, 5). The lower staff is in bass clef and provides a harmonic accompaniment with notes and rests.

Measures 6-9. The upper staff continues the melodic development with slurs and fingerings. The lower staff accompaniment includes some tremolos and rests.

Measures 10-13. The upper staff features a dense texture with many slurs and accents. The lower staff accompaniment consists of rhythmic patterns.

Measures 14-17. The upper staff continues with slurs and accents. The lower staff accompaniment has a steady rhythmic flow.

Measures 18-21. The upper staff includes a dynamic marking 'p' and a 'V' (crescendo) marking. The lower staff accompaniment continues with rhythmic patterns.

Measures 22-25. The upper staff continues with slurs and accents. The lower staff accompaniment concludes the section with rhythmic patterns.

Musical notation for measures 26-29. The system consists of a treble clef staff and a bass clef staff. Measures 26 and 27 are in the treble clef, while measures 28 and 29 are in the bass clef. The music features complex rhythmic patterns with triplets and slurs. Measure numbers 26, 27, 28, and 29 are printed below the respective measures.

Musical notation for measures 30-32. The system consists of a treble clef staff and a bass clef staff. Measures 30 and 31 are in the treble clef, while measure 32 is in the bass clef. The music continues with complex rhythmic patterns and slurs. Measure numbers 30, 31, and 32 are printed below the respective measures.

Musical notation for measures 33-36. The system consists of a treble clef staff and a bass clef staff. Measures 33 and 34 are in the treble clef, while measures 35 and 36 are in the bass clef. The music features complex rhythmic patterns and slurs. Measure numbers 33, 34, 35, and 36 are printed below the respective measures.

Musical notation for measures 37-41. The system consists of a treble clef staff and a bass clef staff. Measures 37 and 38 are in the treble clef, while measures 39, 40, and 41 are in the bass clef. The music continues with complex rhythmic patterns and slurs. Measure numbers 37, 38, 39, 40, and 41 are printed below the respective measures.

Musical notation for measures 42-45. The system consists of a treble clef staff and a bass clef staff. Measures 42 and 43 are in the treble clef, while measures 44 and 45 are in the bass clef. The music features complex rhythmic patterns and slurs. Measure numbers 42, 43, 44, and 45 are printed below the respective measures.

Musical notation for measures 46-49. The system consists of a treble clef staff and a bass clef staff. Measures 46 and 47 are in the treble clef, while measures 48 and 49 are in the bass clef. The music continues with complex rhythmic patterns and slurs. Measure numbers 46, 47, 48, and 49 are printed below the respective measures.

In the following *Adagio Arioso*, I have introduced every species of shake, together with their accompanying resolvents, which can be used in a slow movement. (*Arioso*.)

The small note which is placed before the shake, is simply to show with which finger the shake should be made; but when *two* notes are found to precede it, they must be considered belonging to the shake, and as its preparatory notes.

The 1st bar is a common shake; in bar 3 an up-bow must be used, and in order to begin the shake with greater ease, a small note is first made with a down-bow.

Bars 5, 8, and 25, also contain shakes.

Bar 9, may be considered in the same light, and should be executed thus :

Bar 13 is also without resolvents.

In playing Bar 24, after striking the A (harmonic) the bow should be drawn a little back, in order to use but a small portion of it for the whole bar. This manœuvre will give distinctness to the beginning of the shake; besides, the player would otherwise not have sufficient length of bow.

Bar 27 is a chain of shakes, and, by reason of the Harmony, must be made with resolvents consisting of only a semitone. The Pupil himself will feel this necessity, if he plays the exercise with a Bass accompaniment. Cases of this sort will sometimes occur.

Bar 31 differs but little from the preceding.

In Bar 30, the natural (\natural) placed above the shake, indicates, that it should be struck with the F. (Practice in shaking is of great service in producing flexibility in the finger.)

ADAGIO ARIOSO.

for the Violoncello.

Musical notation for measures 18-22. The system consists of two staves. The upper staff is in treble clef and contains a melodic line with various ornaments and trills. The lower staff is in bass clef and provides a harmonic accompaniment. Measure numbers 18, 19, 20, 21, and 22 are indicated below the lower staff.

Musical notation for measures 23-26. The system consists of two staves. The upper staff continues the melodic line with complex rhythmic patterns and ornaments. The lower staff continues the accompaniment. Measure numbers 23, 24, 25, and 26 are indicated below the lower staff.

Musical notation for measures 27-31. The system consists of two staves. The upper staff features a complex melodic passage with many ornaments and trills. The lower staff continues the accompaniment. Measure numbers 27, 28, 29, 30, and 31 are indicated below the lower staff.

Musical notation for measures 32-34. The system consists of two staves. The upper staff continues the melodic line with ornaments. The lower staff continues the accompaniment. Measure numbers 32, 33, and 34 are indicated below the lower staff.

Musical notation for measures 35-36. The system consists of two staves. The upper staff continues the melodic line with ornaments. The lower staff continues the accompaniment. Measure numbers 35 and 36 are indicated below the lower staff.

Musical notation for measures 37-40. The system consists of two staves. The upper staff continues the melodic line with ornaments. The lower staff continues the accompaniment. Measure numbers 37, 38, 39, and 40 are indicated below the lower staff.

LIGHT AND SHADE, &c.

I have purposely deferred to this place, my remarks on Light and Shade in Playing, because the essential requisite in a Violoncello-school is a knowledge of the proper management of the Bow and fingers, and because without such knowledge, no real expression can exist. But when the Pupil has once acquired some proficiency in Bowing, and has attained a certain degree of perfection in fingering, some knowledge of light and shade in music, and of their proper employment, may be useful to him. He should never forget, that power of tone does not proceed from strength of body, but is the result of a correct knowledge of the use of the bow. It is quite erroneous to imagine because a player produces a strong tone from the instrument, that he must necessarily possess great bodily strength; for strength of tone is so far from being produced by a strong pressure of the fingers upon the strings, that it is well known, this has a directly contrary effect: it stiffens the sinews of the fingers, which are often so weakened by the extreme pressure, that they require whole years of rest before they can be again used for playing. I have known several fine Violinists who completely ruined themselves in this manner.

Among Violin-players, it is generally the first finger which is thus affected. This is most frequently caused by the strings lying too high from the nut over the finger-board. With the hope of preventing the same evil among Violoncellists, I have given particular directions in my chapter on the arrangement of the Instrument, concerning the proper position of the strings.

It is impossible to determine with any degree of certainty, that precise spot upon the strings, from which the best tone can be produced with the bow; for of two Instruments which shall have an exactly equal length of string, and which shall also have strings of the same thickness, one will possess a much greater tension than the other. It is not necessary here to investigate the cause of this difference; but I may remark, that the place in which the tone of the string has the greatest power, is at a distance of about two inches from the bridge, and in which spot the hairs of the bow should cross the string. When the bow is used nearer the bridge, the tone becomes harsh and grating, and when used lower down, it is weak and insipid. Passages which are marked "*alla Gamba*," or "*al Ponticello*," should be played close to the bridge, and with a light bowing. This, however, occurs only in Variations, or in Compositions of a similar description. Many Violoncellists, when they wish to play pianissimo, bring the hairs of the bow across the strings over the finger-board. This is carrying the practice to extremes, but it may be allowable in piano-passages to use the bow somewhat farther than usual from the bridge. In practising the scale, however, where marked *forte*, the bow must be used as near as possible to the bridge, for if in drawing a long note, where the tone should always increase, the bow be not used closer to the bridge, the tone will be broken and imperfect.

The Singer, in order to form his voice, begins by practising scales; but the Instrumentalist, (that is the Player on a stringed-Instrument) should not attempt to play scales until he has acquired some mastery over the mechanical difficulties of his Instrument, as this is an indispensable preliminary to the acquirement of fine execution and delicate expression. I would, therefore, now advise the Pupil to devote himself in earnest to the study of Scales, and to begin by practising them upon the two first strings as high as the harmonic A, holding out every note as long as possible. The pressure of the bow should not be made with the arm, but with the hand; i. e. the arm, in playing the scale, must not be held stiff, but should move freely throughout, as I have already strongly insisted upon in the beginning of this Treatise.

The Scale should be played in the following manner:

The following Adagio is accurately marked with all the expressions of light and shade necessary to indicate the feeling with which the piece should be played. I have only to remark, with respect to the 7th Bar, that when, in a slow movement notes occur which are marked to be played together in one Bow, and also marked with dots above, each note must be separated from the other by a short cessation of the bow. In order to give more force to the expression, a slight pressure is also frequently made upon each note. But when notes marked with the slur and dot occur in quick movements, each note will then require but a very gentle pressure. Unfortunately, it frequently happens that players do not sufficiently distinguish between slurred notes with dots, and slurred notes with strokes. Slurred notes which are marked with strokes above should be played shorter, and more detached than those marked with dots. This difference, however, is not marked with sufficient care by many Composers.

In the 29th and 30th Bars of the following Adagio, the D flat and A flat should properly be taken with the third finger, but in these passages, they will be made with greater certainty with the little finger.

First system of musical notation. The upper staff is in treble clef and contains a complex melodic line with many slurs and ornaments. The lower staff is in bass clef and contains a simpler accompaniment. A dynamic marking of *sf* is present in the upper staff.

Second system of musical notation. The upper staff continues the melodic line with various ornaments and slurs. The lower staff continues the accompaniment. Dynamic markings include *sf* and *p*.

Third system of musical notation. The upper staff features a more active melodic line with slurs and ornaments. The lower staff continues the accompaniment. A dynamic marking of *f* is present in the upper staff.

Fourth system of musical notation. The upper staff continues the melodic line with slurs and ornaments. The lower staff continues the accompaniment. Dynamic markings include *p* and *f*.

Fifth system of musical notation. The upper staff continues the melodic line with slurs and ornaments. The lower staff continues the accompaniment. Dynamic markings include *f* and *p*.

Sixth system of musical notation. The upper staff continues the melodic line with slurs and ornaments. The lower staff continues the accompaniment. Dynamic markings include *p*.

The following Composition is a species of Concertino. The Introduction is not so flowing as the Adagio, and consequently it must be executed throughout with rather more force. With respect to the "*Allegro brillante*" which follows it, the expression "*brillante*" is sufficient to indicate the style in which it is intended to be played. In this piece, all the shades of expression must be well brought out, and the Cantabile parts not played too piano.

From the 39th to the 46th Bar, is what is called a passage, in which the first four Bars should be played with the whole length of the bow. For the sake of variety, the passage, when repeated, should be played piano, and with a short Bowing. After the 47th Bar, some passages follow, in which there occur groups of six tied, and two detached notes. In an earlier part of this work, I have spoken of the sort of bowing proper to be applied to such passages. They should be played with the greatest lightness and ease, or they will produce a stiffness in the arm. The last movement *Con Allegrezza*, (with vivacity) should be played with a shorter bowing than the *Allegro brillante*, more especially as the Bar of $\frac{6}{8}$ Time never requires so long a bow as the Bar of Common, or C time. If, however, Arpeggios, or similar Bowings should occur, they must be played with a greater length of bow.

The Octaves in the 46th Bar should be bowed in the same manner as Syncopated notes, and those in the 47th Bar should be made with the wrist only. The concluding arpeggios should be executed with a very light Bowing, and in proportion as they become more piano in tone, the shorter should be the stroke of the bow used in making them, and the bow itself should be used gradually towards the point. The concluding Chord must be made, as aforesaid, with a down-bow.

Romberg's School

The first system of musical notation consists of two staves. The upper staff is in treble clef and the lower in bass clef. The key signature has two sharps (F# and C#). The music begins with a piano (*p*) dynamic. The upper staff contains a melodic line with eighth and sixteenth notes, including a triplet of eighth notes. A dynamic marking of *fz* (forzando) appears above a note, followed by another *fz* and then *sf* (sforzando) and *p*. The lower staff provides a simple harmonic accompaniment with quarter and eighth notes.

The second system of musical notation consists of two staves. The upper staff is in treble clef and the lower in bass clef. The key signature has two sharps. The music begins with a mezzo-forte (*mf*) dynamic. The upper staff features a complex melodic line with many sixteenth and thirty-second notes, including a triplet of sixteenth notes. The lower staff continues with a simple accompaniment of quarter notes.

The third system of musical notation consists of two staves. The upper staff is in treble clef and the lower in bass clef. The key signature has two sharps. The music begins with a piano (*p*) dynamic. The upper staff contains a melodic line with eighth and sixteenth notes, including a triplet of eighth notes. The lower staff provides a simple accompaniment with quarter notes.

The fourth system of musical notation consists of two staves. The upper staff is in treble clef and the lower in bass clef. The key signature has two sharps. The music begins with a mezzo-forte (*mf*) dynamic. The upper staff features a complex melodic line with many sixteenth and thirty-second notes, including a triplet of sixteenth notes. The lower staff continues with a simple accompaniment of quarter notes.

The fifth system of musical notation consists of two staves. The upper staff is in treble clef and the lower in bass clef. The key signature has two sharps. The music begins with a mezzo-forte (*mf*) dynamic. The upper staff features a complex melodic line with many sixteenth and thirty-second notes, including a triplet of sixteenth notes. The lower staff continues with a simple accompaniment of quarter notes.

The sixth system of musical notation consists of two staves. The upper staff is in treble clef and the lower in bass clef. The key signature has two sharps. The music begins with a forte (*f*) dynamic. The upper staff features a complex melodic line with many sixteenth and thirty-second notes, including a triplet of sixteenth notes. The lower staff continues with a simple accompaniment of quarter notes.

This page of musical notation is for a piano piece, likely from the 'Romberg's School' series. It consists of eight systems of staves. The first system uses a grand staff with a treble clef on the upper staff and a bass clef on the lower staff. The key signature is one sharp (F#), and the time signature is 3/4. The notation includes various musical symbols such as slurs, accents, and dynamic markings like 'p' (piano) and 'f' (forte). The subsequent systems are primarily bass clef staves, with the right-hand part of the grand staff often being omitted or simplified. These systems feature complex rhythmic patterns, including sixteenth and thirty-second notes, and are heavily annotated with fingerings (numbers 1-5) and articulation marks. The piece concludes with a final cadence in the eighth system.

First system of musical notation. The upper staff is in treble clef and the lower staff is in bass clef. The key signature has two sharps (F# and C#). The music features a complex melodic line in the upper staff with slurs and accents, and a more rhythmic accompaniment in the lower staff. Dynamic markings include *sf* and *p*.

Second system of musical notation. The upper staff continues the melodic line with slurs and accents, while the lower staff provides accompaniment. Dynamic markings include *sf*, *p*, and *fz*.

Third system of musical notation. The upper staff features a melodic line with slurs and accents, and the lower staff has a rhythmic accompaniment. Dynamic markings include *fz* and *p*.

Fourth system of musical notation. The upper staff shows a melodic line with slurs and accents, and the lower staff has a rhythmic accompaniment. Dynamic markings include *p*.

Fifth system of musical notation. The upper staff features a melodic line with slurs and accents, and the lower staff has a rhythmic accompaniment. Dynamic markings include *p*.

Sixth system of musical notation. The upper staff features a melodic line with slurs and accents, and the lower staff has a rhythmic accompaniment. Dynamic markings include *f*.

The first system of music consists of two staves. The upper staff is in treble clef and contains a complex, rhythmic melody with many sixteenth and thirty-second notes. The lower staff is in bass clef and provides a harmonic accompaniment with fewer notes. A dynamic marking of *p* (piano) is placed below the lower staff.

The second system continues the musical piece. The upper staff features a melodic line with some rests and a final cadence-like figure. The lower staff continues the accompaniment. A dynamic marking of *p* is present.

The third system shows a continuation of the piece. The upper staff has a melodic line with some rests and a final cadence-like figure. The lower staff continues the accompaniment. A dynamic marking of *mf* (mezzo-forte) is placed below the lower staff. There are also some markings like 'V 2 9' above the upper staff.

The fourth system continues the musical piece. The upper staff features a melodic line with some rests and a final cadence-like figure. The lower staff continues the accompaniment. A dynamic marking of *p* is placed below the lower staff.

The fifth system continues the musical piece. The upper staff features a melodic line with some rests and a final cadence-like figure. The lower staff continues the accompaniment. A dynamic marking of *p* is placed below the lower staff.

The sixth system continues the musical piece. The upper staff features a melodic line with some rests and a final cadence-like figure. The lower staff continues the accompaniment. A dynamic marking of *pp* (pianissimo) is placed below the lower staff.

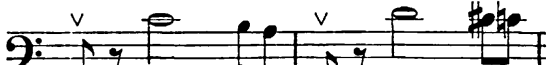

OF DETACHED BOWING.

(This mode of Bowing may be introduced in light, easy passages, and is peculiarly suited to those pieces which are written in a playful style, such as Rondos in $\frac{6}{8}$ Time, or Solos for Chamber-Music. For Music of a higher order, it is not so well adapted, and should never be used except in quick movements.) This Bowing can afford neither advantage nor pleasure to the pupil, unless he has first acquired considerable skill and dexterity in performance. I shall now proceed to explain its nature, and the manner in which it should be executed.

In order to make the bow spring well upon the strings, it should be used in the middle. The bow should be held with the first finger and thumb, and the third finger merely leaned against the nut, but not pressed firmly upon it; the second and fourth fingers should not touch the nut; and, in making the stroke, not more than a finger's breadth of the length of the bow should be used. The motion of the bow is here made entirely with the hand, and with not too great a pressure. The arm, as usual, must be held free from all stiffness. This mode of Bowing cannot be employed in *forte* passages, since these latter require a greater pressure of the bow. This bowing was formerly in great repute with all Artists, who introduced it in passages of every description. It is, however, quite incompatible with a fine broad style of playing, which fully accounts for the inferiority of their compositions. Now-a-days Musical compositions are expected to contain more solidity, both in signification and expression. To obtain proficiency in this mode of bowing, let the pupil use the open D string, as being the most convenient, thus: *Allegro.*  &c.

ON DIVIDED NOTES.

When, in playing two notes, the former is separated from the latter in such a manner as to produce the effect of a pause between them, which takes away half the value of the first note, that note is said to be divided, thus: 

The first note, which is divided, must here be made with an up-bow, used quite at the point, and the crotchet played as if it were a quaver with a pause, thus: 

Divided notes never occur but when the music is marked "*Forte.*" The Bow must be used close to the bridge, in order to give the note its proper degree of tone.

OF THE STACCATO.

This mode of Bowing, when used for several notes or passages consecutively, is more peculiarly adapted to the Violin; since in playing this Instrument, the bow rests upon the strings, and requires but a slight motion of the hand to produce the staccato. It is required of the Violin-player, that he be able to execute this sort of Bowing. But this is not the case with the Violoncello, where the bow does not rest with its own weight on the strings, and where the staccato cannot be produced with merely a gentle pressure, so that it must either be made with the arm held stiff, or the bow must be drawn up so tight as to spring upon the strings by its own tension, and even then, the Player can never be sure of success.) Indeed, as the Violoncellist is so seldom called upon to employ the staccato, it would be a great pity that he should spoil his Bow-hand by practising it to any extent; and I would rather advise him to abstain from it wholly and entirely. In Quartetts and other compositions (which are not to be considered as Solos) passages are marked to be played staccato. The notes of such passages may be played with a short, detached Bow.

ADDITIONAL REMARKS ON BOWING.

In order to supply some modes of bowing which are not furnished in the former part of this work, I subjoin the following Theme with Variations. Here I have to remark, that all the variations must not be played in the same time as the Theme, but according to the bowings and marks placed before each of them. The few bars at the end of each variation, are written only for the Bass accompaniment, and are introduced, in order to give the Player time to rest, as no intermission between the variations would engage him in an endless and useless fatigue.

VARIATION 1—should be played with a long and smooth bow.

IN VARIATION 2—are introduced some covered Harmonics.

VARIATION 3—requires a bowing peculiar to itself. It must begin with an up-bow; a very small portion of the bow must be used throughout; and the shorter notes be made only with the wrist. Those notes which are not dotted, should be made with a moderately long Bowing.

VARIATION 4—also begins with an up-bow.

VARIATION 5—is written in sixes, and requires nothing but flexibility of finger.

VARIATION 6—contains the most difficult of all Bowings, because it often takes away from the player all mastery over the Bow. In order to avoid this, let the bow be held quite still after striking the first note. To make this more clear to the reader, I have, in the four first bars of this variation, introduced demi-semiquaver rests, in place of the dots.

VARIATION 7—should be begun with an up-bow, as it is very easy to execute, and lies convenient for the hand.

VARIATION 8—is to be played with a detached Bow, concerning the management of which, I have already made some remarks. In the 8th Bar, the thumb must remain firm in its position.

VARIATION 9—consists of double-stops, which may require some practice to execute with precision.

After this Variation follows a Coda (appendix) as a conclusion of the piece. This sort of composition is frequently concluded with a Minuet or Scherzo, but these are introduced only where the piece is shorter than the one in question. The Arpeggios at the beginning of the Coda, should be made with the end of the Bow, and in the arpeggios towards the conclusion of the piece, the first note of the first and third group in the Bar, should be struck short and sharp. In the concluding Bars, the Bow should be guided by the slightest possible motion of the elbow-joint.

The image displays a musical score for Cello, titled "ANDANTE GRAZIOSO." The score is written in G major (one sharp) and 3/4 time. It consists of three systems of music, each with a treble and bass staff. The first system includes a tempo marking "ANDANTE GRAZIOSO." and features various bowing techniques such as slurs, accents, and fingerings (e.g., 1, 2, 3, 4). The second system continues the piece with similar notation. The third system concludes with a Coda, indicated by a double bar line with two dots. The score includes numerous musical notations such as slurs, accents, and fingerings to guide the performer.

Var. 1.

First system of musical notation for Var. 1. The treble staff contains a melodic line with eighth and sixteenth notes, while the bass staff provides a simple accompaniment of quarter notes.

Second system of musical notation for Var. 1. The treble staff includes fingering numbers: 1, 3, 1, 1, 0, 0, 3, 3, 4. A wavy line labeled '2a' is present below the treble staff.

Third system of musical notation for Var. 1. The treble staff includes fingering numbers: 1, 4, 0, 1, 2, 3. A wavy line labeled '2a' is present below the treble staff.

Fourth system of musical notation for Var. 1. The treble staff includes fingering numbers: 4, 1, 4, 2, 1, 4, 3, 3, 4, 4, 4, 1, 4.

Fifth system of musical notation for Var. 1. The treble staff includes fingering numbers: 1, 4, 0, 1, 2, 3. A wavy line labeled '3a' is present below the treble staff.

Var. 2.

Musical notation for Var. 2. The piece begins with the instruction 'POCO PIU LENTO.' The treble staff features trills (tr) and fingering numbers: 2, 3, 2, 2.

The first system of music consists of two staves. The upper staff is a grand staff with a treble clef and a key signature of one sharp (F#). It contains a complex, flowing melodic line with numerous slurs, ties, and fingering numbers (1, 2, 3). The lower staff is a bass clef staff with a simple accompaniment of quarter and eighth notes.

The second system features three staves. The top staff is a treble clef staff containing a violin part with several trills (tr) and triplet markings (3). The middle staff is a grand staff with a treble clef, continuing the complex melodic line from the first system. The bottom staff is a bass clef staff with a simple accompaniment.

The third system consists of two staves. The upper staff is a treble clef staff with a violin part featuring several trills (tr) and slurs. The lower staff is a bass clef staff with a simple accompaniment.

The fourth system consists of two staves. The upper staff is a grand staff with a treble clef, showing a complex melodic line with slurs and ties. The lower staff is a bass clef staff with a simple accompaniment.

The fifth system consists of two staves. The upper staff is a grand staff with a treble clef, showing a complex melodic line with slurs and ties. The lower staff is a bass clef staff with a simple accompaniment.

The sixth system features three staves. The top staff is a treble clef staff with a violin part. The middle staff is a grand staff with a treble clef, continuing the complex melodic line. The bottom staff is a bass clef staff with a simple accompaniment.

Var. 3.

Medesimo Tempo.

The musical score consists of six systems, each with a piano (treble clef) and bass (bass clef) staff. The key signature is one sharp (F#) and the time signature is common time (C). The score is marked 'Medesimo Tempo.' and includes various musical notations such as slurs, accents, and fingerings (1-4). The first system features a complex melodic line in the piano part with slurs and fingerings (1, 1, 1, 3, 3, 3, 4, 3, 2, 1, 3, 4). The second system continues the melodic development with slurs and fingerings (3, 3, 3, 3, 3, 3, 3, 3). The third system introduces a more rhythmic texture with slurs and fingerings (0, 2a, 3, 4, 5, 4, 3, 0, 1, 0, 4, 0, 3, 3, 4, 4, 4, 4). The fourth system features a complex melodic line with slurs and fingerings (4, 4, 4, 4, 4, 3, 1, 3, 3, 3, 0). The fifth system continues the melodic development with slurs and fingerings (3, 3, 3, 3, 3, 3, 3, 3). The sixth system concludes the piece with slurs and fingerings (3, 1, 0, 3a).

Var. 4.

Var. 5.

Var. 6.

$p = 60$. PIU LENTO.

The first system of musical notation for 'Var. 6' consists of two staves. The upper staff is in treble clef with a key signature of one sharp (F#) and a common time signature (C). It features a complex, flowing melodic line with many slurs and fingerings (1, 2, 3). The lower staff is in bass clef with the same key signature and time signature, providing a simple accompaniment of quarter notes.

The second system continues the piece. The upper staff maintains the intricate melodic pattern with slurs and fingerings. The lower staff continues with its steady quarter-note accompaniment.

The third system shows the continuation of the melodic and accompanimental lines. The upper staff's melody is highly technical, while the lower staff remains simple and rhythmic.

The fourth system of notation. The upper staff features a melodic line with some trills and slurs. The lower staff continues with quarter notes, ending with a whole note chord.

The fifth system of notation. The upper staff has a melodic line with slurs and fingerings. The lower staff continues with quarter notes, ending with a whole note chord.

The sixth and final system of notation on this page. The upper staff concludes with a melodic phrase. The lower staff concludes with a final bass line of quarter notes.

First system of musical notation, featuring a treble clef staff with a complex melodic line and a bass clef staff with a simple accompaniment. The treble staff includes fingerings 3, 4, 4, and 3.

Second system of musical notation, featuring a treble clef staff with a complex melodic line and a bass clef staff with a simple accompaniment. The treble staff includes fingerings 0, 1, 0, 4, 0, 2, 3, 1, and 2.

Third system of musical notation, featuring a treble clef staff with a complex melodic line and a bass clef staff with a simple accompaniment.

Var. 7.

♩-66

NON TANTO LENTO.

First system of musical notation for Var. 7, featuring a treble clef staff with a complex melodic line and a bass clef staff with a simple accompaniment.

Second system of musical notation for Var. 7, featuring a treble clef staff with a complex melodic line and a bass clef staff with a simple accompaniment.

Third system of musical notation for Var. 7, featuring a treble clef staff with a complex melodic line and a bass clef staff with a simple accompaniment. The treble staff includes fingerings 41, 04, 1, 02, 320, 02, 32, 4, 0, 1, 4, 1, 4, 1, 4.

First system of musical notation. The upper staff is in treble clef with a key signature of one sharp (F#) and contains a complex melodic line with many sixteenth notes. The lower staff is in bass clef and contains a simpler accompaniment line. Fingering numbers 0, 1, 2, 3, 4, and 1 are visible in the upper staff.

Second system of musical notation. The upper staff continues the melodic line with sixteenth-note patterns. The lower staff continues the accompaniment. Fingering numbers 3, 2, 0, 4, 3, 4, 0, 2 are visible in the upper staff.

Third system of musical notation. The upper staff features a more intricate melodic passage with triplets and sixteenth notes. The lower staff continues the accompaniment. Fingering numbers 41, 02, 1201, 1, 1 are visible in the upper staff.

Fourth system of musical notation. The upper staff shows a highly technical melodic section with many sixteenth notes and triplets. The lower staff continues the accompaniment. Fingering numbers 1, 1, 4, 1, 0, 2, 4, 3, 0, 1, 3, 1, 0, 3 are visible in the upper staff.

Fifth system of musical notation. The upper staff continues the technical melodic passage with sixteenth-note runs and triplets. The lower staff continues the accompaniment. Fingering numbers 1, 3, 4, 1, 3, 4, 0, 3, 1, 4 are visible in the upper staff.

Sixth system of musical notation. The upper staff concludes the melodic line with a final flourish. The lower staff concludes the accompaniment. A fingering number 1 is visible in the upper staff.

for the Violoncello.

Var. 8.

The first system of music features a treble clef with a key signature of one sharp (F#) and a common time signature (C). The tempo is marked '♩ = 60'. The right hand plays a complex, rhythmic pattern of eighth and sixteenth notes, with a '3a' fingering indicated. The left hand plays a simple bass line with quarter notes and rests.

The second system continues the piece. The right hand has a dense texture of sixteenth-note patterns. The left hand continues with a steady bass line.

The third system shows the right hand with a melodic line that includes a trill-like figure. The left hand maintains its rhythmic accompaniment.

The fourth system features a change in the right hand's texture, with more distinct eighth-note patterns. The left hand continues with quarter notes.

The fifth system introduces a treble clef for the right hand, which now plays a more active, sixteenth-note melody. The left hand continues with a simple bass line.

The sixth system features a bass clef for the right hand, which plays a complex, sixteenth-note pattern with various fingering numbers (1, 2, 3, 4) and accents. The left hand continues with a simple bass line.

First system of musical notation, consisting of two staves. The upper staff is in treble clef and contains a complex, fast-moving melodic line with many sixteenth notes. The lower staff is in bass clef and contains a simpler accompaniment line with quarter and eighth notes.

Second system of musical notation, consisting of two staves. The upper staff continues the complex melodic line from the first system, featuring various fingering numbers (1, 2, 3, 4) and a fermata. The lower staff continues the accompaniment.

Third system of musical notation, consisting of two staves. The upper staff continues the complex melodic line with many sixteenth notes and includes a fermata. The lower staff continues the accompaniment.

Fourth system of musical notation, consisting of two staves. The upper staff continues the complex melodic line, which appears to be ascending in pitch. The lower staff continues the accompaniment.

Fifth system of musical notation, consisting of two staves. The upper staff is mostly empty, indicating a rest for the treble part. The lower staff continues the accompaniment line.

Var. 9.

Sixth system of musical notation, labeled 'Var. 9'. It consists of two staves. The upper staff features a melodic line with many slurs and fingering numbers (1, 2, 3, 4). The lower staff contains a simple accompaniment line.

for the Violoncello.

First system of musical notation, featuring a treble clef staff with a key signature of one sharp (F#) and a common time signature (C). The right hand contains complex chords and melodic lines with numerous fingerings (0, 1, 2, 3, 4) and slurs. The left hand provides a steady bass accompaniment.

Second system of musical notation, continuing the piece. The right hand features more intricate chordal textures and melodic passages with detailed fingerings. The left hand continues with a consistent rhythmic accompaniment.

Third system of musical notation. The right hand shows a dense arrangement of chords and melodic fragments. A wavy line labeled "Sass." is present in the right hand staff, indicating a section for the saxophone. The left hand maintains the accompaniment.

Fourth system of musical notation. The right hand has a wavy line labeled "Sass." and some notes. The left hand continues with the accompaniment, showing some melodic movement.

Fifth system of musical notation. The right hand features a rapid, rhythmic pattern of chords. The left hand continues with the accompaniment. The text "TEMPO PRIMO." is written above the right hand staff, and "CODA." is written below the left hand staff.

Sixth system of musical notation, the final system on the page. The right hand continues with the rapid chordal pattern. The left hand concludes the accompaniment with a few final notes.

First system of musical notation. The upper staff contains a complex melodic line with numerous slurs and fingerings (0, 4, 0, 4, 1, 0, 2). The lower staff provides a simple harmonic accompaniment.

Second system of musical notation. The upper staff continues the melodic line with slurs and fingerings (1, 2, 0, 0, 2, 1, 1, 1, 2). The lower staff continues the accompaniment.

Third system of musical notation. The upper staff continues the melodic line with slurs and fingerings (1, 0, 2, 2, 0, 4, 2, 0). The lower staff continues the accompaniment.

Fourth system of musical notation. The upper staff continues the melodic line with slurs and fingerings (1, 0, 2, 1, 3). The lower staff continues the accompaniment.

Fifth system of musical notation. The upper staff continues the melodic line with slurs and fingerings (0, 2, 0, 1, 2, 1, 2, 4, 1, 1, 1). The lower staff continues the accompaniment.

Sixth system of musical notation. The upper staff continues the melodic line with slurs and fingerings (1, 3, 0). The lower staff continues the accompaniment.

The first system consists of two staves. The upper staff is in treble clef with a key signature of one sharp (F#) and a common time signature. It contains several measures of music with notes, rests, and dynamic markings like *f* and *mezzo*. The lower staff is in bass clef with the same key signature and time signature, providing a harmonic accompaniment.

The second system features a treble staff with a triplet of eighth notes marked with '1 3' and a bass staff. The music continues with various rhythmic patterns and dynamics.

The third system shows a treble staff with multiple triplet markings (3a) and a bass staff. The notation includes complex rhythmic figures and dynamic markings.

The fourth system is dominated by a bass staff with intricate sixteenth-note patterns. The upper staff is mostly empty, with only a few notes visible. Dynamics include *f* and *mezzo*.

The fifth system continues with a bass staff featuring sixteenth-note patterns and a treble staff. The music is marked with *f* and *Mezzo*.

The sixth system shows a bass staff with sixteenth-note patterns and a treble staff. It includes dynamic markings like *f* and *Mezzo*, and some numerical markings such as 3202, 210, and 3.

OF EXECUTION.

It is scarcely possible to lay down any fixed rules by which the learner may know how to execute every description of passage which chance may throw in his way. Some general remarks on the subject may, however, prove useful, and may furnish principles to serve as a foundation for this art. Music may be considered in the light of declamatory language. The spirit and signification of a speech depends on the importance of the information it conveys, on the variety of tone used in the pronunciation of the words it contains, on the rising and falling inflexions, and on the strength or weakness of the voice. If a speech be pronounced monotonously, it must utterly fail in its desired effect, and can produce no other feelings in the hearers but those of languor and ennui. It is precisely the same case with Music, whenever it is played without a due admixture of light and shade, and a proper regard to feeling and expression. There is also a close analogy between the Rhythm of Music and the Rhythm of Verse; for in the former, the long and short syllables are regulated in the same manner as in the latter; for instance, the words "I LOVE THEE" would be executed in Music thus:

Here the D is a suspension to C. If an appoggiatura were introduced, both the Rhythm and Expression would be entirely altered; and it

would then be expressed thus :  The Appoggiatura, which is marked with a small note, would require no

more accent than the note which it precedes ;* on the contrary, the suspension, whenever it falls upon a large note, when marked either **FORTE**, or **PIANO**, (of course in proportion) requires a slight accent. This adaptation of the strength of emphasis in proportion to the pitch of the voice must also be carefully attended to in discourse. When, however, the Composer wishes to produce a peculiar effect, his intention must be expressly notified. Suspensions, which occupy a prominent position in Melody, are of various kinds ; some commence from above, others from below :

Sometimes they consist of long, sometimes of short notes. To those who have not studied Thorough Bass, the following remarks may serve as a more certain guide, and as a rule to be applied in execution. The suspension together with the following note, is not always accompanied by a rest, but the melody is frequently continued. Sometimes several suspensions will occur in succession, thus :

In such cases, the accent must be marked with great precision. In passages like the following,

the proper accent is easily perceived. In passages such as

the accent should be scarcely audible ; it will not fail to be properly expressed if the semiquaver be played very short. The quicker the time of the movement, the less time should be given to the last note of the suspension, in order that the music may not produce a heavy, protracted effect. At the end of a phrase, the finishing note of the suspension may be made so short as to be scarcely audible. Care should be taken to distinguish between the cadence itself, and the concluding note of a suspension.

The **AUFTACT**, or Preparatory-Bar, requires particular attention in its execution. In the Adagio, and in all slow movements, the Preparatory-Bar, when it consists of only one note, should be played with even more time than strictly belongs to it, in order that it may be more perfectly blended, as it were, with the full Bar. In the Allegro, on the other hand, it should be played shorter than it is noted, to give more force to the notes of the full Bar.† Even in playing the first note of the full Bar, it will make some difference whether the time be Allegro or Adagio. The first note of a full Bar in an Allegro movement marked **FORTE**, requires the strongest possible force ; whereas in the Adagio it is not necessary to mark it so strongly, in order to give more scope for an increase or diminution of power as the movement proceeds. The Adagio will thus acquire softness and fluency, and the Allegro, power and spirit. In the same manner, the first note of a full Bar in the Allegro, when marked **PIANO**, is always played soft ; in the Adagio, on the other hand, the same note is always executed with a slight emphasis. As a general rule, the player should endeavor to give more attention to expression in the Adagio, and other slow movements, than in any of those pieces marked to be executed in a quick time ; for if any one were to attempt to introduce the same variety of light and shade in the Allegro movement of a Concerto, as in an Adagio, he would find it entirely destructive of a fine, broad style of playing. In fine, it must all depend upon whether the music be noted in long or short notes. When written in short notes, the expression is never so marked as when written in long notes, both in quick and in slow movements.

* What is here denominated Suspension, must not be confounded with Suspension in Thorough Bass.

† It must be here understood, that this is the case when the Preparatory Bar introduces a fresh movement, or a new phrase of the movement.

The swelling and diminution of the tone is invariably regulated by the rising or falling of the scale. The ascending scale is more prominently marked than the descending. But if, in the descending scale, a note should occur at the end which does not belong to the key in which the music is there written, this note will require a stronger accent; and there are very few cases in which it will not be made a prominent feature of the passage. The following figure will perhaps more clearly illustrate the accent with which this melody should be played :

Here it may be perceived that the expression of passion increases in proportion as the notes rise in the scale, and that the accent becomes less strong as the scale descends. The last note but one is a suspension, and therefore requires a stronger accent than the note which precedes it, although the latter stands higher in the scale. Every phrase of a melody may be illustrated in the same manner as the above; and when the principle I have just explained is well understood, the player will seldom fail in giving every passage its just expression. There is but one exception to the rule here laid down, which is in pieces written in counterpoint, where a Theme is introduced for several parts, and where the melody of the Theme must be made rather more prominent. This will seldom happen in Solo pieces, though some few expressions to that effect are sometimes found. Very rapid passages, however, do not require the same marks for expression, since in these cases it is only requisite to make a few notes here and there prominent, in order to deprive the passage of its otherwise monotonous effect.

The following passage will serve as an example of the case in which a single note is introduced, which does not belong to the key, and which, although in the descending scale, must be played with a marked accent.

This B \flat , A: must however be considered a suspension. The Orator, when delivering a speech, lowers his voice in those parts where he wishes to make a serious impression upon his auditors, and raises it when endeavoring to excite their spirits. The minor keys, in a descending motion, are used in music in the same manner, whenever deep feeling is intended to be expressed. The cause of this is, that in the major keys, the notes, both of the ascending and descending scales, remain unaltered, whilst in the ascending scale of the minor keys, one, and sometimes two notes must be raised, in order to get a leading note to the octave, without which the scale cannot be concluded. Whenever this occurs as the last note, whether in the ascending or descending scale, it must, for the sake of expression, be played with rather more accent than the other notes. Also, if in a minor key, a note should occur which is not marked in the signature, (i. e. an accidental sharp or flat), it will require a particular accent. The melancholy expression, which is peculiar to minor keys, is found in these accents. Hence, in order to elevate the character of this mode, the major seventh (the leading note) is made rather sharper, and the minor seventh somewhat flatter than in the major scale. We must take care, however, not to carry this rule to extremes, or it will produce a most disagreeable effect. I must here again repeat that it is impossible for me to lay down rules for all the cases in which a note may require a particular accent. A few cases illustrative of the above remarks are here subjoined.

In No. 1, C \sharp is the leading note, although the lowest in the scale; it must therefore have the strongest accent.

In No. 2, E \flat is the expressive note, and requires to be played with emphasis.

No. 3 is a common passage, and subject to the same rules as the major key.

In No. 4 the accent must fall upon the C sharp, although it occurs in a descending scale, because it is an accidental, and does not properly belong to the key.

In No. 5 the C \sharp must not be considered as an appoggiatura, and must therefore have a stronger accent than the following note.

The remarks upon suspensions in major scales are equally applicable to minor scales.

ON PROGRESSION OF HARMONY.

The Violoncellist should have some acquaintance with harmony, otherwise he cannot properly accompany a Quartet. The Bass may be considered the foundation of the construction of Music. Distinctness and promptitude are not sufficient, as the expression contained in the Harmony is especially confided to the Bass. A knowledge of Harmony is therefore indispensable to the Violoncellist. I here present the Amateur, who may not have an opportunity of pursuing a regular study of the rules of Harmony, with a synopsis, by which he may acquire some knowledge of Modulation, Resolutions, Intervals, and Progression of Harmony. We shall first discuss the Intervals, that is, the distances between notes. These are divided into four classes, major, minor, diminished, and sharp.

The image displays musical notation for intervals from Unison to Ninths. Each interval is shown on a bass clef staff with a bracket above it. The intervals and their qualities are as follows:

- UNISON:** Unison, Chromatic Semitons.
- SECONDS:** Major, Minor, Sharp.
- THIRDS:** Major, Minor, Diminished, Sharp, Perfect.
- FIFTHS:** Sharp, Diminished, Perfect, Flat, Sharp.
- SIXTHS:** Major, Minor, Diminished, Sharp, Major, Minor.
- OCTAVES:** Diminished, Perfect, Diminished, Sharp.
- NINTHS:** Major, Minor.

All these intervals are similar in every key. Next follow the Chords and their inversions; that is, the various changes of the fundamental Bass-note in the chord. There are two fundamental chords: the common chord, or triad, with its inversions; and the discord of the seventh, with its inversions; the chord of the ninth is not a fundamental chord, as it cannot be inverted. All the other chords originate from these two.

The triad or common chord  consists of the fundamental bass, the third, and fifth.

The chord of the sixth  consists of the third and sixth.

The chord of the fourth and sixth  consists of the fourth and sixth. It remains unchanged, whether the key be major or minor.

The discord of the seventh  consists of the third, fifth, and seventh.

The chord of the fifth and sixth  consists of the third, fifth, and sixth.

The chord of the third and fourth  consists of the third, fourth, and sixth.

The chord of the second  consists of the second, fourth, and sixth.

The chord of the ninth  consists of the third, fifth, seventh, and ninth.

First system of musical notation. The upper staff contains a melodic line with eighth and sixteenth notes, including slurs and fingerings (1, 4, 0). The lower staff contains a bass line with chords and accidentals: b^3 , b^7 , b^7 , b^7 , b^7 , and $\#^6$.

Second system of musical notation. The upper staff continues the melodic line with slurs and fingerings (3, 2, 1, 2). The lower staff contains chords and accidentals: b^7 , b^7 , b^6 , b^6 , $\#^7$, and b^7 .

Third system of musical notation. The upper staff continues the melodic line with slurs and fingerings (1, 2, 3). The lower staff contains chords and accidentals: $\#^6$, b^7 , b^7 , b^7 , and b^5 .

Fourth system of musical notation. The upper staff continues the melodic line with slurs and fingerings (1, 3, 1, 2, 1, 2). The lower staff contains chords and accidentals: b^5 , b^6 , b^6 , b^6 , b^6 , and b^5 .

Fifth system of musical notation. The upper staff continues the melodic line with slurs and fingerings (1, 2, 1, 2, 1, 3). The lower staff contains chords and accidentals: b^5 , b^6 , b^6 , $\#^5$, $\#^5$, and $\#^7$.

Sixth system of musical notation. The upper staff continues the melodic line with slurs and fingerings (1, 3, 1, 3, 1, 3, 1, 3). The lower staff contains chords and accidentals: $\#^7$, $\#^6$, $\#^5$, b^6 , and b^4 .

First system of musical notation. The upper staff contains a melodic line with various accidentals and fingerings. The lower staff contains a bass line with notes and rests. Chord symbols are written below the bass line: 5 , $\#6$, $\#6_4$, 5_4 , $\#5_4$, $\#5_3$, 5_7 , b_4 .

Second system of musical notation. The upper staff continues the melodic line. The lower staff contains notes and rests. Chord symbols are: b_4 , b_4 , b_5 , $\#5_3$, $\#5_3$, $\#5_4$.

Third system of musical notation. The upper staff features more complex melodic patterns with fingerings. The lower staff contains notes and rests. Chord symbols are: b_7 , b_5 , b_5 , b_5 , b_5 , b_7 .

Fourth system of musical notation. The upper staff continues with melodic lines and fingerings. The lower staff contains notes and rests. Chord symbols are: b_4 , b_3 , b_3 , b_5 , b_3 , b_5 .

Fifth system of musical notation. The upper staff shows melodic lines with fingerings. The lower staff contains notes and rests. Chord symbols are: b_3 , b_7 , b_7 , b_7 , b_7 , b_5 .

Sixth system of musical notation. The upper staff continues the melodic line. The lower staff contains notes and rests. Chord symbols are: b_4 , b_5 , b_5 , b_5 .

First system of musical notation. The upper staff contains a melodic line with various accidentals and slurs. The lower staff contains a bass line with chordal accompaniment, including chords such as $\text{II}^{\flat} \text{6} \text{9} \text{e}$, $\text{II}^{\flat} \text{4} \text{e}$, $\text{b}^{\flat} \text{7} \text{9} \text{e} \text{7}$, $\text{7} \text{9} \text{e} \text{7}$, and $\text{II}^{\flat} \text{6} \text{9} \text{e}$.

Second system of musical notation. The upper staff continues the melodic line with slurs and fingerings. The lower staff contains chords such as $\text{b}^{\flat} \text{7} \text{9} \text{e} \text{7}$, $\text{II}^{\flat} \text{6} \text{9} \text{e}$, $\text{b}^{\flat} \text{7} \text{9} \text{e} \text{7}$, $\text{II}^{\flat} \text{6} \text{9} \text{e}$, and $\text{II}^{\flat} \text{7} \text{9} \text{e} \text{7}$.

Third system of musical notation. The upper staff features a more active melodic line with slurs. The lower staff contains chords such as $\text{II}^{\flat} \text{5}$, $\text{6} \text{9} \text{e}$, $\text{7} \text{9} \text{e}$, $\text{II}^{\flat} \text{7} \text{9} \text{e} \text{7}$, and $\text{5} \text{4}$.

Fourth system of musical notation. The upper staff continues with slurs and fingerings. The lower staff contains chords such as $\text{b}^{\flat} \text{7} \text{9} \text{e} \text{7}$, $\text{6} \text{9} \text{e}$, $\text{7} \text{9} \text{e}$, $\text{II}^{\flat} \text{6} \text{9} \text{e}$, $\text{b}^{\flat} \text{7} \text{9} \text{e} \text{7}$, and $\text{6} \text{9} \text{e}$.

Fifth system of musical notation. The upper staff continues with slurs and fingerings. The lower staff contains chords such as $\text{II}^{\flat} \text{6} \text{9} \text{e} \text{7}$, $\text{6} \text{9} \text{e}$, $\text{II}^{\flat} \text{6} \text{9} \text{e} \text{7}$, $\text{6} \text{9} \text{e}$, $\text{b}^{\flat} \text{6} \text{4}$, and $\text{6} \text{9} \text{e}$.

Sixth system of musical notation. The upper staff continues with slurs and fingerings. The lower staff contains chords such as $\text{b}^{\flat} \text{6} \text{4}$, $\text{6} \text{9} \text{e}$, and $\text{6} \text{9} \text{e}$. The system concludes with a double bar line and the word "FINE." in the right margin.

DICTIONARY

OF ITALIAN, FRENCH, GERMAN, ENGLISH, AND OTHER MUSICAL TERMS.

A. (Italian) by far.
